A Career in Healthcare Starts Here

Quality Education. Fulfilling Careers.

At Cambridge, we're focused on helping our students prepare for and obtain a healthcare related career. Over the years, Cambridge has proudly helped prepare thousands of graduates for successful careers in healthcare.

Our instructors are among the finest in their disciplines, and they offer a supportive and caring learning environment. Students learn in a hands-on setting, using medical equipment found in hospitals and healthcare settings today. Clinical externship training is available for most programs, so students receive valuable real-life experience.

This information guide is designed to provide the basic information needed to begin identifying the healthcare career opportunities that best fit you. If you'd like more specifics, or would like to speak with an admissions representative who can help you decide on the best path for you, don't hesitate to give us a call.

To your success,

The Cambridge Team

Healthcare: An Industry on the Rise

It's no secret, careers in healthcare are in high demand when compared to most other career opportunities.

Why?

An aging population and government programs, like Obamacare, are some of the driving forces behind the growth of healthcare related careers. In fact, the Bureau of Labor Statistics (www.bls.gov) predicts the most employment growth by 2022 will be among health care support jobs.**

Some Industry Highlights!

- Since the Affordable Care Act was signed into law in 2010, the healthcare industry has gained nearly 1 million new jobs.*
- 17 of the 30 fastest growing jobs over the next decade are in the healthcare industry.**
- Occupations (like most in healthcare) typically requiring postsecondary education for entry, generally had higher median wages and faster job growth.**

There's been no better time to find your role in such a high demand industry. For more information on the opportunities within the career-specific healthcare programs offered here at Cambridge, read through the following program pages in this guide.
