General Information

HISTORY
Cambridge Institute of Allied Health & Technology was established and licensed by
the Commission for Independent Education in 2001 (license # 2453). The institution
was institutionally accredited by the Accrediting Bureau of Health Education Schools
(ABHES) in 2004. Cambridge Institute changed ownership in October of 2009 to
Cambridge Health Education I, LLC. In 2010 Cambridge Health Education I, LLC
acquired two additional campuses; one in Delray Beach, Florida (a Main campus) with a
CIE # 2843 and another in Atlanta, Georgia (Branch of main in South Florida). In January
2016 a name change to place to Cambridge College of Healthcare & Technology

CAMPUS LOCATIONS
Cambridge College/Cambridge Institute
  • 5150 Linton Blvd., Suite 340, Delray Beach, FL 33484
  • 5669 Peachtree Dunwoody Rd. NE Suite 100, Atlanta, GA 30342
  • 460 E. Altamonte Drive 3rd Floor Altamonte Springs, FL 32701

FACILITY
This campus consists of 9 large classrooms, a Radiologic Lab, DMS Lab, and Nursing Lab,
administrative and education offices as well as a student library and break area. All the
equipment used at Cambridge College of Healthcare & Technology is compatible with
industry standards and effectively meets the objectives of the programs. Standard
equipment includes reference books, journals and audiovisual aids, which complement
curriculum objectives. This is a non-smoking facility.

STATEMENT OF OWNERSHIP
IAMP, LLC is a wholly owned subsidiary of Cambridge Health Education I, LLC d/b/a/ Cambridge Institute of Allied Health & Technology, a Florida Corporation. The
Managing Member of Cambridge Health Education I, LLC is Dr. Terrence LaPier.

MISSION STATEMENT
The mission of Cambridge College of Healthcare & Technology is to improve the
quality of people's lives by providing excellent training to traditional and nontraditional
students in the healthcare field. Cambridge College’s desire is to develop students for
lifelong and continued education and is dedicated to assisting adult students in their
career opportunities.

GOALS AND OBJECTIVES
Cambridge College of Healthcare & Technology’s aim is to enrich the student’s education
through comprehensive training, which is essential to meet the demands of medical
offices, hospitals, medical centers and clinics. An integral part of achieving our goals is
through:
• The promotion of self-discipline and self-motivation
• Attracting and retaining effective and qualified instructors
• Offering sound diploma and degree programs
• The development of students individual & professional growth which includes interpersonal communication, critical thinking and problem solving competencies

LICENSING
Cambridge College of Healthcare & Technology in Delray Beach, Florida is licensed by the Commission for Independent Education, Florida Department of Education (license # 2843). Additional information regarding this institution may be obtained by contacting the commission at 325 W. Gaines St., Suite 1414, Tallahassee, FL 32399-0400, toll-free telephone number (888) 224-6684.

ACCREDITATION
Cambridge College of Healthcare & Technology is institutionally accredited by the Accrediting Bureau of Health Education Schools (ABHES), 7777 Leesburg Pike, Suite 314N, Falls Church, Virginia 22043, P(703) 917–9503, F(703) 917-4109 a national accrediting agency recognized by the United States Department of Education under provisions of Chapter 33, Title 38, U.S. Code, and subsequent legislation.

*The Computed Tomography Review and the IV Infusion Therapy Course does not fall under the grant of accreditation for the Accrediting Bureau of Health Education Schools (ABHES).

The Diagnostic Medical Sonography program is accredited by the Commission on Education Accreditation of Allied Health Education Programs, 1361 Park Street, Clearwater, FL 33756, P (727) 210-2350, F (727) 210-2354, mail@caahep.org.

PROGRAM AND POLICY CHANGES
Cambridge College of Healthcare & Technology reserves the right to make changes in organizational structure, policies and procedures, equipment and materials, and modify the curriculum as deemed necessary. When size and curriculum permit, classes may be combined. Students are expected to be familiar with the information presented in this Catalog and applicable Student Handbooks. Cambridge College of Healthcare & Technology obtains the right to make changes to the admissions requirements, tuition, fees and degree requirements. Students will be notified of any changes.

INSURANCE
The school does not provide personal, medical or liability insurance against fire, theft, or vandalism of students' personal property. Students are covered by professional liability insurance during the clinical courses of their program.
HOURS OF OPERATION
The hours for the business office of Cambridge College are Mon-Thursday 8:30 a.m. to 7 p.m., and Friday from 8 a.m. – 5 p.m.

PARKING
Student parking is available in parking lot adjacent to the campus. Students are prohibited from parking in “Patient Parking” designated areas.

CLASS SIZES
Radiology Lab 10:1
Clinical Rotation 10:1 (PN and ASN)
Distant Education 25:1
Lecture 30:1
Lab 20:1

CREDIT HOURS
Semester Credit Programs: The units of measure used are standard semester credit hours. One semester credit hour equals a minimum of 15 clock hours of lecture, or 30 clock hours of laboratory or 45 clock hours of clinical/externship. Additional time will be calculated for outside work.

The Practical Nursing, Ophthalmic Technician, and Phlebotomy Technician programs are offered in clock hours.

A clock hour is defined as 60 consecutive minutes, of which a minimum of 50 minutes is dedicated to instruction.

CLASS SCHEDULES

• Residential Classes Meet Monday - Friday 8:30am – 10:00pm
• Distance Education taught through Blackboard®
• Externship Hours S M T W TH F S 6:00am – 11:59pm
  ➢ Actual times for externships are set by the externship sites.
• PN Evening Externship hours will be evening, All Day Saturday or Sunday
PERSONAL APPEARANCE
All students are expected to be neat, clean, and dressed in Cambridge uniform. The student’s footwear should consist of clean white sneakers or medical clogs. While assigned to an externship site, the student must adhere to that facility’s dress code in addition to the program’s policy. If such rules are not followed, the school will take disciplinary action. Please refer to your program handbook for more details on the dress code.

HOUSING
Cambridge College of Healthcare & Technology does not have dormitory or housing facilities.

STUDENT HEALTH AND SAFETY
Cambridge College of Healthcare & Technology will attempt to provide safe facilities and a workplace free of recognized hazards. Each program has specific guidelines that will be explained by the individual instructors. Students are expected to use common sense at all times to prevent injury to themselves and others. The school maintains first aid kits for emergencies. All accidents and injuries must be reported to a Program Director or Administrative Staff immediately.

CRIME AWARENESS AND CAMPUS SECURITY ACT
Cambridge College provides the following information to all of its employees and students as part of the institution’s commitment to safety and security pursuant to the requirements of the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act.

The Campus Security Report is available on our web page to obtain the information is located on our web site. It should be noted that this report is updated annually. Information on Crime Statistics is also available on the National Center for Education Statistic’s College Navigator website. The National Center for Education Statistics (NCES) is the primary federal entity for collecting and analyzing data related to education in the U.S. and other nations. NCES is located within the U.S. Department of Education and the Institute of Education Sciences.

TIMELY WARNINGS
In the event that a situation arises, either on or off campus, in the judgment of the CEO, constitutes a series and/or continuing threat, a campus wide “timely warning” will be issued. Notices will be posted in each common area. Students will be notified of locations for public notice during Orientation.

CONFIDENTIAL REPORTING PROCEDURES
If you are a victim of a crime and unsure if you want to pursue action within the Institute
system or the criminal justice system, you may still make a confidential report. The 
Campus Director may be told of the details of the incident in confidence. The purpose of 
confidential reporting is to comply with your wish to keep the matter confidential, while 
taking steps to ensure you future safety and the safety of others. With such 
information, the Institute can keep accurate records of the number of incidents involving 
students, determine where there is a pattern of crime with regard to a particular location, 
method or assailant, and alert the campus community to potential danger. These 
incidents are counted and disclosed in the annual crimes statistics for the institution with 
no identifying information.

SMOKE FREE FACILITIES
Florida Statute 386.205 2(a) states that smoking is not permitted inside educational 
facilities where the public attends class. It is the policy of Cambridge College of 
Healthcare & Technology that it is smoke-free and that all designated smoking areas be 
located out-of-doors. Any member of the Institute community found to be in violation of 
this policy will be subject to suspension and/or permanent dismissal.

TRANSCRIPTS
Student transcripts are permanently maintained at the institution and are available from the 
Registrar. One copy of the official academic transcript is provided to each student upon 
program completion and satisfaction of all financial obligations to the school. 
Students may request, in writing, additional copies of transcripts from the Registrar for a 
fee of $5.00 each.

ACADEMIC HONESTY AND PLAGIARISM
Cambridge College of Healthcare & Technology strives for a spirit of honesty and 
integrity. All students are expected to do their own work and must never present 
other’s work as their own. (Examples may include the following as well as others not 
mentioned), looking on another student’s paper, talking during an exam, copying another 
student’s work, cheating during an exam, and unauthorized use of notes, books, tapes, 
and head-sets. Students found guilty of dishonesty or plagiarism are liable for 
sanctions up to and including dismissal.

GRADUATION REQUIREMENTS
In order to graduate from a program, students must meet the following requirements:
• CGPA of 2.0 or higher, 2.8 for Nursing Programs 
• 90% didactic attendance (clock hour programs) 
• 100% Clinical completed in all programs if applicable 
• Fulfillment of all financial obligations

COURSE NUMBERING SYSTEM
The courses are numbered in sequence to ensure that all required classes are taught to 
provide students with necessary information for successful program completion. All one 
series numbers are for first year and all two series numbers are for second year students.
Admissions Process

Admissions Requirements
Applicants must complete and submit an application for admissions that includes:

- Admission interview
- Personal statement
- Proof of High School Graduation
  - The requirements of High School Graduation (POG) consist of one of the following:
    - Diploma from high school
    - GED
    - Official college transcript confirming associate, bachelors or master’s degree
    - Evaluated and translated Foreign High School Transcripts (If Applicable)
- Application fee of $50.00
- Program Director Interview
- Drug Screen & Background Check Acknowledgment

Any student submitting proof of high school from a foreign country for consideration of admission is required to provide a translation and evaluation by an approved organization recognized within the Department of Education.

Any applicant who is under the age of 18 and applying for admissions to Cambridge College of Healthcare & Technology must acquire a parent or guardian’s signature on any contractual papers (i.e., Enrollment Agreement), and must verify that they will be 18 years or older at the time they begin their clinical rotations.

Entrance Testing for Nursing Programs ONLY
Applicants to the Practical Nursing and Associate of Science in Nursing Programs must complete and pass a Wonderlic assessment in order to be considered for the Program. The test is free of charge to applicants. Students may take the Wonderlic test only twice in any 6 month period. All attempts count toward the number of attempts, including those transferred from other institutions. Students must meet the minimum requirement in all sections. Passing scores on the Wonderlic assessments are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>WBST v</th>
<th>WBST q</th>
</tr>
</thead>
<tbody>
<tr>
<td>Practical Nursing</td>
<td>180</td>
<td>200</td>
</tr>
<tr>
<td>Associate of Science in Nursing</td>
<td>210</td>
<td>220</td>
</tr>
</tbody>
</table>
Radiologic Technology, Radiation Therapy, and Diagnostic Medical Sonography, must complete a program director interview assessment in order to be considered for the program. Acceptance is based on applicants achieving a minimum score of 6 out of 13 for the interview and completion of all other admission requirements. Criteria for the program director interview are based on:

- Appearance
- Articulation and communication skills
- Knowledge of profession
- Scheduling availability
- Transfer of credits

NON-DISCRIMINATION AND AMERICANS WITH DISABILITIES ACT

Cambridge College of Healthcare & Technology is an Equal Opportunity Educational institution and does not discriminate in the recruitment and admission of students with respect to race, color, creed, sex, age, handicap, disability, national origin, or any other legally protected characteristic.

Applicants, prospective, or current students with disabilities who require academic adjustments and/or auxiliary aids in connection with the admissions process, the admissions test and/or their program of study, should contact the person responsible for coordinating our efforts to comply with Section 504. The ADA Coordinator and the Campus Director will work with the applicant and/or prospective student to identify reasonable accommodations/adjustments necessary to enable him or her to fully participate in the admissions and educational processes.

TRANSFER OF CREDIT

Transfer of credit is always the decision of the individual college or university and is controlled by the receiving college. Accreditation does not guarantee transfer of credits.

Applicants requesting credit earned for previous training at another post-secondary institution must submit sealed official transcripts to the Registrar with 30 day of starting a program. In order to be considered, the institution where the credit was previously earned must be accredited by an agency recognized by the United States Department of Education and/or the Commission for Higher Education Accreditation (CHEA).

CLEP is not accepted for Transfer Credit.

ADVANCED STANDING / PROFICIENCIES

The College does not award credit for Advanced Standing, nor does the College permit students to proficiency out of courses.

Transfer of credit from prior education must meet the following requirements:

- College course must be completed within 20 years of admission to Cambridge
College with a minimum grade of a C or higher. Any student wishing to submit transcripts from a foreign country for consideration of admission is required to provide a translation and evaluation by an approved organization recognized within the Department of Education.

Reduction of tuition for transfer of credit is not to exceed 16 credits.

_This entire policy excludes the Practical Nursing Program._

TRANSFERABILITY OF CREDIT TO OTHER INSTITUTIONS
Transferability of credit is at the discretion of the accepting institution, and it is the student’s responsibility to confirm whether or not credits will be accepted by another Institution of the student’s choice. Cambridge does not guarantee that any credits earned at Cambridge will be transferable or accepted by any other institution. Each institution has its own policies governing the acceptance of credit from other institutions. Students should inquire as to policies on credit transfer at any institution to which they seek admission.

BACKGROUND CHECK AND DRUG SCREENING
Cambridge College of Healthcare & Technology is committed to a drug free and safe learning environment for all students. The allied health professions are committed to providing excellence in patient care and services in a safe, productive and quality-conscious environment. As such, clinical and community agencies require students to meet standards, similar to employees, for criminal offenses and use of illegal substances. Therefore, all students will be required, at their own expense, to be screened for background checks, and substance abuse screens prior to clinical assignments. The program reserves the right to retest a student if there is reasonable suspicion of consumption of alcohol or drugs. Any student dismissed from Cambridge College of Healthcare & Technology because of violation of the alcohol/drug or illegal substances will not be considered for readmission to the school until the student has undergone drug counseling and/or treatment and recommendations from the appropriate agencies have been submitted to the school. It is the sole discretion of the school as to whether or not the student will be readmitted.

Felony Disclosure
Please be advised that if you have been convicted of a felony or DUI you may not be eligible for certain clinical experiences, externships or certifications associated with our educational programs. Those with non-felonious criminal backgrounds may also find it difficult to secure employment within a health care setting.
Grievance Procedures

GRIEVANCE DEFINED
A grievance is a claim, a complaint or an expression of concern made by a student regarding any aspect of his or her educational experience including misapplication of campus policies, rules, regulations, and procedures, or unfair treatment, such as coercion, reprisal, or intimidation by an instructor or other campus employee.

APPEALS FOR STUDENTS & ACADEMIC AFFAIRS
A student has the right to appeal all matters with respect to:
• Admissions decisions
• Tuition and fees matters
• Financial awards or policies, including satisfactory academic progress
• Educational policies, procedures, and grading concerns

GENERAL POLICY
The Academic Affairs Committee shall be responsible for evaluating and making a final decision for an appeal. The committee will decide whether the appeal will be approved or denied. The committee will consist of a combination of faculty & staff members.

Before the Student & Academic Affairs Committee meets for an appeal, due process must include:

Step 1: Any student with a grievance may request an individual conference with the instructor or administrative staff to address the matter.

Step 2: If unable to resolve the grievance, the student can request a conference with the Program Director or Department Manager.

Step 3: If still unable to resolve the grievance, the student is requested to schedule a conference with the Campus Director. If the Campus Director cannot reach an agreement with the student, the grievance is referred to the Registrar who then facilitates the scheduling of a meeting with the Student & Academic Affairs Committee.

Each conference will be scheduled within a reasonable timeframe, not to exceed 7 days.

Procedures for the Student & Academic Affairs Committee include:

Step 1: The Registrar will schedule the meeting with the Committee within 7 business days and the student will be notified via email or regular mail of the date and time.

Step 2: The student must accept the invitation to meet with the committee within 48
hours via phone or email.
Step 3: At the end of the meeting the student will verbally receive the Committee’s decision. The Committee’s decision will be sent to the student by mail or email within 7 business days.

The decision made by the Student & Academic Affairs Committee shall be final.

If, in the judgment of the student, there is no satisfactory resolution, the student may contact the Vice President of Compliance and Regulatory via email at jorloff@cambridgehealth.edu.

If, in the judgement of the student, there is still no satisfactory resolution, the student may contact:

PROGRAMS

(All Programs are taught in English)

Diagnostic Medical Sonography
98 Semester Credits
2378 Clock Hours
96 Weeks
Credential awarded – Associate of Science
Method of Delivery: Blended

Program Objectives
The mission of the Diagnostic Medical Sonography program is to provide a comprehensive education that will prepare students to become sonographers. The program is structured to provide intellectual stimulation and learning in the didactic and clinical settings using psychomotor, affective and cognitive domains. It is necessary to prepare students to assume the responsibilities of a sonographer, provide quality patient care and to contribute to their profession by a commitment to professional organizations and lifelong learning. These beliefs are the foundation of the sonography profession and are realized through commitment to the education of sonographers in the community. At the completion of the Diagnostic Medical Sonography program, a student is prepared to enter the sonography work force as an entry level sonographer in any or all modalities including Abdomen, OBGYN, and Cardiovascular Sonography. Upon graduation, clinical employment opportunities can range from hospital settings, out-patient clinics, private practice and specialty centers, mobile and agency services all throughout the domestic United States and International markets.

Program Description
The Associate of Science Degree in Diagnostic Medical Sonography is an educationally broad based postsecondary full time program. This 96 week program is designed to provide the essentials of entry level sonographic medical imaging. The curriculum leads the student through primary sonographic education in the specialties of Abdomen, including full abdominal and small smarts, Obstetrics & Gynecology, including female pelvis and 1st, 2nd and 3rd trimester Obstetrics imaging, and Cardiovascular including the application and techniques in cardiac imaging and cardiac Doppler studies, cardiac anatomy and function. The course also provides an introduction to the principles of Vascular Sonography, introducing the two common vascular examinations most widely used by sonographers; Lower Extremity Venous Doppler and Carotid Doppler examinations. In addition to Medical Terminology, Pharmacology, and an introduction to Health Science, Sonographic Anatomy and Sonographic Physics are covered. The core curriculum devotes significant “hands-on” laboratory and clinical education skills components. The program requires general education courses in General Physics, Anatomy & Physiology, Algebra, Psychology,
English and Speech. Students receive consistent sequential didactic and scheduled laboratory instruction throughout the program. Students complete one thousand two hundred ninety (1290) didactic hours of classroom and laboratory education and one thousand eighty eight (1088) hours of clinical training within an approved clinical facility. Assessments take place at regular intervals throughout the program evaluating the student’s progress towards specific levels of competency. Students must complete each course with a 2.0 or higher to remain in the program.

Course Descriptions

BCS 1085 Anatomy & Physiology I 4 Semester Credits 75 Clock Hours
In this course will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved. Anatomy and Physiology I will focus on the cells, cell metabolism, tissues and membranes, integumentary system and body temperature, skeletal system, muscular system, nervous system tissue and brain, nervous system spinal cord & peripheral nerves, autonomic nervous system and endocrine system. Students will explore the structure and function of tissues and organs in a laboratory setting.

Prerequisites: None

BCS 1086 Anatomy & Physiology 2  
4 Semester Credits 75 Clock Hours
This course is a continuation of BSC 1085 lecture. Students will continue to will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved. Students will explore the structure and function of tissues and organs in a laboratory setting. This will include visiting the office of the Medical Examiner, Video web cast of dissections and autopsies.

Prerequisites: BCS 1085

DMS A 1002 Principles of Sonographic Physics and Instrumentation
5 Semester Credits 90 Clock Hours
Presents in-depth training in the properties of ultrasound and Doppler physics, instrumentation, equipment operations, display systems, recording devices, image artifacts, biological effects of ultrasound and quality assurance methods. Student will apply sonographic physics and instrumentation principles in an ultrasound laboratory setting.

Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053

DMS A 1003 Sonographic Anatomy
3 Semester Credits 60 Clock Hours
Introduces ultrasound scanning principles and protocols. Topics include scanning criteria and standardization of image documentation for physician interpretation, normal anatomy, physiology and sonographic appearance of the abdomen, OB/GYN, vascular, and cardiac structures. Students will apply sonographic anatomy principles in an ultrasound laboratory setting.

Prerequisites: BSC 1085, BSC 1086, MEA 1239, HSC 1000, PHY 2053

DMS A 2001 Principles of Abdominal Sonography 1
4 Semester Credits 75 Clock Hours
Presents cross-sectional anatomy of the abdomen, normal and abnormal sonographic findings of the intra-abdominal organs, peritoneal spaces and retroperitoneal structures. The relationship of abnormal findings to patient history, physical examination and
laboratory findings are stressed. Students will learn and perform abdomen exam
protocols in an ultrasound laboratory.
Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A
1002, DMS A 1003

DMS A 2002 Principles of Abdominal Sonography 2 4 Semester Credits 75
Clock Hours
This course is a continuation of Principles of Abdominal Sonography I containing a
comprehensive approach to in-depth studies of the organs contained within the human
abdominal cavity in both normal and abnormal states. This course further explores
small parts including: breast, testicular, prostate, and thyroid in addition to an
introduction to musculoskeletal, neonatal brain, spine, hips and interventional
sonography. Students will continue to learn and perform abdomen exam protocols in an
ultrasound laboratory including phantom scanning of various small parts.
Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A
1002, DMS A 1003, DMS A 2001

DMS A 2003 Principles of OBGYN Sonography 1 4 Semester Credits 75
Clock Hours
Presents cross sectional anatomy of the female pelvis, normal and abnormal
sonographic features of the non-gravid pelvis, as well as normal and abnormal anatomy
of the first trimester. Embryology, early fetal development and the relationship of
abnormal findings of the patient history, physical examination and laboratory findings
are emphasized. Students will learn and perform transabdominal pelvic exam protocols
in an ultrasound laboratory.
Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A
1002, DMS A 1003, DMS A 2001, DMS A 2002

DMS A 2004 Principles of OBGYN Sonography 2 4 Semester Credits 75
Clock Hours
Presents normal and abnormal anatomy and sonographic features of the second and
third trimester pregnancies. The relationship of patient history, physical examination,
and laboratory findings with abnormal fetal and maternal findings is emphasized.
Students will continue to learn and perform transabdominal pelvic exam protocols in
an ultrasound laboratory including phantom scanning for second and third trimester
pregnancies.
Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A

DMS A 2005 Introduction to Vascular Sonography 4 Semester Credits 75
Clock Hours
This section of the course provides hands on experience in the application of the two
most common vascular examinations: the lower extremity venous doppler exam and
the carotid doppler exam. The student will also participate in the application and
technique studied in the didactic section of the course. The laboratory sessions also emphasize and encourage the student to recognize the normal anatomy and normal ultrasonic findings while learning and performing exam protocols for lower extremity venous Doppler and carotid Doppler ultrasound exams. After completion of the basic principles, the course focuses on pathology and dysfunction and the disease process. Prerequisites: BSC 1085, BSC 1086, MEA1239, MAC 1105, PHY 2053, DMS A 1002, DMS A 1003

DMS A 2006 Echocardiographic Pathology 4 Semester Credits 75 Clock Hours
After the basic principles, the course will be focusing on pathology and dysfunction and the disease process. Cardiac pathology covered includes: left ventricular dysfunction, coronary artery diseases, valvular heart disease, Doppler-(Color, PW, and CW), diseases of the aorta & pulmonary hypertension. Coordination of the patient’s history, physical findings and Sonographic images are evaluated for presentation. Discussions will be both detailed and concise for understanding and comprehension. Students will learn and perform echo ultrasound exam protocols in an ultrasound laboratory.
Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A 1002, DMSA 1003, DMS A 2009

DMS A 2007 Echocardiographic Pathology 4 Semester Credits 75 Clock Hours
This course provides a foundation for cardiomyopathies and IHD, evaluation of pericardial and intra cardiac tumors, anomalies of the aorta and great vessels, congenital heart diseases, pericardial pathologies, tumors and diseased valves. Each section of disease will be discussed in detail regarding causes, signs symptoms, echocardiographic findings and complications. This course also discusses wall motion abnormalities in relation to pathologic situation. Discussion is both detailed and concise for understanding and comprehension. Students will continue to learn and perform echo ultrasound exam protocols in an ultrasound laboratory.
Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A 1002, DMS A 1003, DMS A 2009, DMS A 2006

DMS A 2008 Pharmacology 4 Semester Credits 75 Clock Hours
This course involves understanding of clinical pharmacology including theory, effects of drugs used in Echocardiography and pharmacology of provocative stress agents and their uses and adverse effects. This course also discusses potential side effects of cardiac medications on the Echo findings and involves understanding the indications, utility of advances in echocardiography such as Stress echocardiography Transesophageal echocardiography, Intraoperative echocardiography, & Contrast echocardiography.
Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A 1002, DMS A 1003

DMS A 2009 Introduction to Echocardiographic Anatomy 4 Credits 75 Clock Hours
This course provides a foundation in the principle of echocardiography, the most effective non-invasive method for use in cardiac diagnosis. This course involves understanding of the normal cardiac anatomy, coronary anatomy, and the relationship of chambers and the great vessels. An understanding of EKG, Electrophysiology, conduction system and mechanical events of the cardiac cycle in relation to electrical events will be stressed. This course provides the application and techniques in 2D cardiac imaging, M-mode, cardiac studies, cardiac anatomy and function. Students will learn and perform EKG exam protocols in an ultrasound laboratory.

Prerequisites: BSC 1085, BSC 1086, MEA 1239, MAC 1105, PHY 2053, DMS A 1002, DMS A 1003

DMS A 2010 Clinical Externship I 6 Credits 272 Clock Hours
This course introduces students to the clinical setting and provides an opportunity for students to observe and participate in Sonographic procedures, at the clinical sites discretion. All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required competencies related to but not exclusive to Abdomen in the clinical setting.
Prerequisites: BSC 1085, BSC 1086, ENC 1101, SPC 1016, PSY 1012, HSC 1000, MEA 1239, MAC 1105, PHY 2053, DMS A 1002, DMS A 1003

DMS A 2011 Clinical Externship II 6 Semester Credits 272 Clock Hours
This course, a continuation of the clinical setting in Clinical Externship I, allows students to continue in the clinical setting and provides additional opportunity to observe and have in depth participate in Sonographic procedures, at the clinical sites discretion. All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required competencies related to but not exclusive to OBGYN in the clinical setting. Students will continue building oral skills to communicate clearly, concisely, and intelligently to medical professionals and patients and will begin using written skills to communicate clearly, concisely, and intelligently. Student will begin to possess the ability to demonstrate critical thinking and problem solving skills. The course also supports student’s ability to better understand and apply allied health occupational information as well as encourage occupational attitudes and work ethic desired of allied health employers and members of the specific profession.
Prerequisites: BSC 1085, BSC 1086, ENC 1101, SPC 1016, PSY 1012, HSC 1000, MEA 1239, MAC 1105, PHY 2053, DMS A 1002, DMS A 1003, DMS A 2001, DMS A 2010

DMS A 2012 Clinical Externship III 6 Semester Credits 272 Clock Hours
This course introduces students to the clinical setting and provides an opportunity for students to observe and participate in Sonographic procedures, at the clinical sites discretion. All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required competencies related to but not exclusive to vascular examinations such as
lower extremity venous and carotid doppler examinations in addition to an introduction to cardiac echo examinations in the clinical setting. The student will continue to build upon proper oral skills and will have the ability to communicate clearly, concisely, and intelligently with medical professionals and patients. Also, the student will have the opportunity to build upon written skills to communicate clearly, concisely, and intelligently along with the ability to demonstrate critical thinking and problem solving. This course continues to support the student’s ability to demonstrate occupational attitudes and work ethic desired of allied health employers and members of the specific profession.

DMS A 2013 Clinical Externship IV 6 Semester Credits 272 Clock Hours
This course, a continuation of the clinical setting in Clinical Externship III, allows students to continue in the clinical setting and provides additional opportunity to observe and future participate in Sonographic procedures, at the clinical sites discretion. All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required competencies related to but not exclusive to echocardiography examinations in the clinical setting. The course continues to encourage the student’s to communicate clearly, concisely, and intelligently with medical professionals and patients as well as continuing to build upon critical thinking and problem solving skills in an independent manner. This course will present to the student the correct way to function as a productive team member. The course will facilitate the ability to understand and apply allied health occupational information and build upon the student’s ability to demonstrate occupational attitudes and work ethics.

DMS A 2014 Seminar 3 Semester Credits 45 Clock Hours
In this course the student is prepared for the real world of work via assistance with resume writing, interviewing techniques and job placement. In addition, registry preparation and reviews are conducted for all modalities of the program: Abdomen, OBGYN, and Cardiovascular.

ENC 1101 English Composition 3 Semester Credits 45 Clock Hours
Students will learn grammar, punctuation and usage skills that are useful in everyday
language. The goals of effective writing will be covered as well as essay preparation. Students will take several mastery and editing tests as part of the course. Students will review readings for writing to aid in essay preparation and completion.
Prerequisites: None

HSC 1000 Introduction to Health Science 3 Semester Credits 45 Clock Hours
This course will exam the health care professionals and how they interact with patients. Professional organizations, OSHA standards, asepsis, and isolation techniques will be covered.
Prerequisites: None

MAC 1105 College Algebra 3 Semester Credits 45 Clock Hours
Students in this course will explore college algebra through a detailed examination of practical applications. Students will calculate algebraic problems with linear equations, exponents, polynomials, factors, and rational expressions. Student will solve problems using graphs, slopes, inequalities, linear equations, roots, radicals and quadratic equations.
Prerequisites: None

MEA 1239 Medical Terminology 2 Semester Credits 30 Clock Hours
This course provides instruction in how to decipher useful medical terminology into everyday language. Students analyze and learn prefixes and suffixes, spelling use and correct pronunciation. Medical abbreviations and symbols are included.
Prerequisites: None

PSY 1012 Introduction to Psychology 3 Semester Credits 45 Clock Hours
In this course, students learn basic principles of human behavior. Challenges, responsibilities, problems and satisfactions of being a health care provider are discussed. Theories of human behavior and personality development are included.
Prerequisites: None

PHY 2053 General Physics 3 Semester Credits 45 Clock Hours
This course is designed to cover a broad range of physics topics. As these topics are applied to various problem situations, the student will develop critical thinking skills and through the use of group activities which the student will enhance cooperative attitudes. In addition to the knowledge base development in physics the use of computer technologies are integrated throughout the entire course. Topics include technical math calculations, units of measurements, mechanics, heat, fluid, and gas laws, atomic structures and nuclear physics, electromagnetic, light and sound.
Prerequisites: MAC 1105

SPC 1016 Fundamentals of Speech 3 Semester Credits 45 Clock Hours
Students will learn the foundations of communications including public presentations and interviewing skills.
Prerequisites: None
Radiologic Technology
2640 Hours
99 Credits
90 Weeks
Credential Awarded: Associate of Science Degree
Type of Instructional Delivery: Blended

PROGRAM DESCRIPTION/PROGRAM OBJECTIVES
The program is 90 weeks in length. The program is designed to provide a well-planned didactic and clinical education experience to enable students to become competent, entry-level professionals upon graduation.

The curriculum has been developed in accordance with the guidelines established by the American Society of Radiologic Technologists (ASRT). The clinical competency requirements have been developed in accordance with ARRT (American Registry of Radiologic Technologists) guidelines.

During the second semester of the program, students attend classes and receive laboratory instruction. Beginning with the third semester of the program, students begin clinical externships. Clinical externships will be assigned three days per week. Clinical hours range weekdays from 7:00 am to 11:00 pm. Clinical sites are within a 100 mile radius from the campus.

Note: BCLS Training will be provided to students prior to the first clinical rotation.

Radiologic Technology Curriculum Includes:

**Course Descriptions:**

**CTS 1050 - Introduction to Computers** 3 Credits  45 clock hours (online)
Students will learn the basic operation of Microsoft Word, Excel, and PowerPoint. Students will also learn proper techniques for business letter writing and resume writing.

**Prerequisites:** None

**ENC 1101 - English Composition** 3 Credits  45 clock hours (online)
Students will learn grammar, punctuation and usage skills that are useful in everyday
language. The goals of effective writing will be covered as well as essay preparation. Students will take several mastery and editing tests as part of the course.

**Prerequisites:** None

**HSC 1000 - Introduction to Health Science** 3 Credits 45 clock hours (online)
Students will examine the following topics: The healthcare professions and teams, interactions between and reactions of patients in altered physical &/or mental states including gerontology and diverse cultures, professionalism and professional organizations, vital signs, OSHA standards, asepsis and isolation techniques including universal precautions, ethics and legal concerns of the healthcare provider, lifting/moving/body mechanics, patient and environmental emergency assessment and response, and Basic Cardiac Life Support (BCLS). The student will possess the aptitude to comprehend and use information in both written and oral formats.

**Prerequisites:** None

**MAC 1105 - College Algebra** 3 Credits 45 clock hours
Students in this course will explore college algebra through a detailed examination of practical applications. Students will calculate algebraic problems with linear equations, exponents, polynomials, factors, and rational expressions. Student will solve problems using graphs, slopes, inequalities, linear equations, roots, radicals and quadratic equations.

**Prerequisites:** None

**MEA 1239 - Medical Terminology** 2 Credits 30 clock hours (online)
This course will provide students with instruction in how to decipher useful medical terminology into everyday language. Students analyze and learn prefixes and suffixes, spelling use and correct pronunciation. Medical abbreviations and symbols are included.

**Prerequisites:** None

**PSY 1012 - Introduction to Psychology** 3 Credits 45 clock hours (online)
In this course, students learn basic principles of human behavior. Challenges, responsibilities, problems and satisfactions of being a health care provider are discussed. Theories of human behavior and personality development are included.

**Prerequisites:** None

**SPC 1016 - Fundamentals of Speech** 3 Credits 45 clock hours (online)
Students will learn the foundations of communications including public presentations and interviewing skills.

**Prerequisites:** None

**BSC 1085 - Anatomy & Physiology I** 3 Credits 45 clock hours (online)
Students in this course will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved. Anatomy and Physiology I will focus on the cells, cell metabolism, tissues and membranes,
integumentary system and body temperature, skeletal system, muscular system, nervous system tissue and brain, nervous system spinal cord & peripheral nerves, autonomic nervous system and endocrine system.

**Prerequisites:** None

**BSC 1085L - Anatomy & Physiology I Lab 1 Credit 30 clock hours**
In an online delivery students in this course will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved. Anatomy and Physiology I will focus on the cells, cell metabolism, tissues and membranes, integumentary system and body temperature, skeletal system, muscular system, nervous system tissue and brain, nervous system spinal cord & peripheral nerves, autonomic nervous system and endocrine system.

**Prerequisites:** None

**BSC 1086 - Anatomy & Physiology II 3 Credits 45 clock hours (online)**
This course is a continuation of BSC 1085 lecture. Students will continue to will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved.

**Prerequisites:** BSC 1085

**BSC 1086L - Anatomy & Physiology II Lab 1 Credit 30 clock hours**
Students will explore the structure and function of tissues and organs in a laboratory setting. This will include visiting the office of the Medical Examiner, Video web cast of dissections and autopsies.

**Prerequisites:** BSC 1085, BSC 1085L & MEA 1239

**RTE 1025 - Principles of Image Production I 2 Credits 30 clock hours**
This course is about the knowledge of the factors that govern and influence the production of radiographic images. Content establishes a knowledge base in radiographic and mobile equipment requirements and design. Content imparts an understanding of the components, principles and operation of digital imaging systems.

**Prerequisites:** BSC 1086, BSC 1086L, RTE 1030, RTE 1203L, RTE1203

**RTE 1026 - Principles of Image Production II 2 Credits 30 Clock Hours**
This course continues with the knowledge of the factors that govern and influence the production of radiographic images. Image-intensified and digital fluoroscopy will be discussed. Image quality and the technical factors that affect it will be covered in this course. Content provides a basis for analyzing radiographic images. Included are the importance of optimal imaging standards, discussion of a problem-solving technique for image evaluation and the factors that can affect image quality. Factors that impact image acquisition, display, archiving and retrieval are discussed. Principles of digital system quality assurance and maintenance are presented Grids and grid applications will be presented as well as the calculations of technique problems.
RTE 1030 - Radiographic Physics  4 Credits  60 clock hours  Students in this course will receive a working knowledge of radiologic physics as it relates to the field of radiography. This will include the make-up of the Bohr atom, electromagnetic radiation, electricity and magnetism and electromagnetism. They will become familiar with equipment used in medical imaging for general x-rays and their production, as well as for special procedures. The student will understand how the x-ray beam is produced as well as the radiographic image. They will also be introduced to the equipment utilized for film processing and the equipment needed to improve the quality of the x-ray image. Students will learn about the components involved in quality improvement, assessment and assurance regarding all aspects of the radiology department. Equipment quality control is included, as well as tests to evaluate specific components of radiographic imaging systems.

Prerequisites: RTE 1025, RTE 1030, RTE 1204 & RTE 1204L

RTE 1202 - Radiographic Procedures I  3 Credits  45 clock hours
This course will cover the discovery of x-rays and the use of radiation in medicine. The course provides an introduction to radiological science and familiarizes students with the different terms that are used within the profession. Students will learn the anatomic structures and topographic landmarks of the abdomen, chest, and parts of skeletal assigned for the semester. Students will learn the synopsis of radiation protection and exposure. Students will learn and practice how to communicate effectively with patients regardless of existing barriers. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology affects the radiographic image and technique.

Prerequisites: None

RTE 1202L - Radiographic Procedures I Lab  1 Credit  30 clock hours
This course is designed to provide instruction in the proper positioning methods in the laboratory setting to prepare the student to perform these methods competently in the clinical setting. This course will include positioning terminology of abdomen and chest radiography as well as positioning terminology of the upper extremity and lower extremity (foot and ankle). Students will master practical experience in positioning patients, exercising independent judgment, creativity, and problem solving in the clinical laboratory. Students will learn the synopsis of radiation protection and exposure. Students work in teams, role-playing and simulating patient and technologist. Student will learn and practice how to communicate effectively with patients and family members regardless of existing barriers. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology affects the radiographic image and technique.

Prerequisites: None

RTE 1203 - Radiographic Procedures II  3 Credits  45 clock hours
This course is designed to expand students’ knowledge and understanding of the ARRT Code Ethics. Students will learn the different types of consent and its appropriate use. The
course will cover the anatomic structures and topographic landmarks of various parts of the skeletal system assigned for the semester. Students will learn the synopsis of radiation protection and exposure. Students will learn and practice how to communicate effectively with patients regardless of existing barriers. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology affects the radiographic image and technique.

**Prerequisites:** BSC 1085, BSC 1085L, RTE 1202 & RTE 1202L

**RTE 1203L - Radiographic Procedures II Lab**    1 Credit     30 clock hours

This course is designed to allow students to conduct simulations on radiographic positions covered in the didactic course. The goal is to make students more competent and confident within the clinical setting. Students will simulate radiographic positions for areas of the skeletal system covered in the didactic course for the semester. Students use an energized x-ray laboratory to master practical experience in positioning patients, exercising independent judgment, critical thinking, and patient care. Students will learn the synopsis of radiation protection and exposure. Students work in teams, role-playing and simulating patient and technologist. Student will learn and practice how to communicate effectively with patients and family members regardless of existing barriers. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology influences radiographic image and technique.

**Prerequisites:** BSC 1085, BSC 1085L, RTE 1202 & RTE 1202L

**RTE 1204 - Radiographic Procedures III**    2 Credits     30 clock hours

The course will cover the anatomic structures and topographic landmarks of various parts of the skeletal system assigned for the semester. Students will learn the synopsis of radiation protection and exposure. Students will learn and practice how to communicate effectively with patients and family members regardless of existing barriers. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology affects the radiographic image and technique.

**Prerequisites:** BCS 1086, BCS 1086L, RTE 1203, RTE 1203L & RTE 1030

**RTE 1204L - Radiographic Procedures III Lab**    1 Credit     30 clock hours

This course is designed to allow students to conduct simulations on radiographic positions covered in the didactic course. The goal is to make students more competent and confident within the clinical setting. Students will simulate radiographic positions for areas of the skeletal system covered in the didactic course for the semester. Students use an energized x-ray laboratory to master practical experience in positioning patients, exercising independent judgment, critical thinking, and patient care. Students will learn the synopsis of radiation protection and exposure. Students work in teams, role-playing and simulating patient and technologist. Student will learn and practice how to communicate effectively with patients and family members regardless of existing barriers. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology influences radiographic image and technique.

**Prerequisites:** BSC 1086, BSC 1086L, RTE 1203, RTE 1203L & RTE 1030
RTE 1205 - Radiographic Procedures IV  2 Credits  30 clock hours
This course will include positioning terminology and radiographic positioning and procedures for fluoroscopy studies. The course will cover several patient care topics that are important to the profession. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology affects the radiographic image and technique. Pharmacologic terminology, drug classifications, pharmacokinetics, and drugs used in imaging are also studied. It also offers comprehensive coverage of diagnostic contrast agents, along with drug administration procedures, emergency responses to drug reactions, and legal and ethical aspects of medication administration. The theory and practice of basic venipuncture techniques and the administration of diagnostic contrast agents are also practiced and mastered.
Prerequisites: BSC 1086, BSC 1086L, RTE1204, RTE 1204L & RTE1025.

RTE 1205L - Radiographic Procedures IV Lab  1 Credit  30 clock hours
This course is designed to provide instructions on proper positioning methods within the laboratory setting so students are prepared to perform these methods competently in the clinical setting. The course will include fluoroscopy studies. Image critique covering the elements of diagnostic radiographs is emphasized. Students will master practical experience in positioning patients, critical thinking, and problem solving in the clinical laboratory. Students will learn the synopsis of radiation protection and exposure. Students work in teams, role-playing patient and technologist. Pathology and disease as they relate to various radiographic procedures are discussed and viewed on radiographs or images viewed on power points. Students will also learn how different pathology affects the radiographic image and technique.
Prerequisites: BSC 1086, BSC 1086L, RTE1204, RTE 1204L & RTE1025

RTE 1206 - Radiographic Procedures V  2 Credits  30 clock hours
The course will include positioning terminology, radiographic positioning, and procedures of the skull and facial structures. Students will learn the synopsis of radiation protection and exposure. Students will learn and practice how to communicate effectively with patients regardless of existing barriers. The course also reviews avenues for professional within the profession and continuing education requirements. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology affects the radiographic image and technique.
Prerequisites: RTE 1205, RTE 1205L, RTE1026 & RTE1030

RTE 1206L - Radiographic Procedures V Lab  1 Credit  30 clock hours
This course is designed to allow students to perform simulations on radiographic positions covered in the didactic course. By the end of the course students will be more competent and confident within the clinical setting. Students use an energized x-ray laboratory to master practical experience in positioning patients, exercising independent judgment, critical thinking, and patient care. Students will learn the synopsis of radiation protection and exposure. Students work in teams, role-playing and simulating patient and technologist. Student will learn and practice how to communicate effectively with
patients and family members regardless of existing barriers. Pathology and disease as they relate to various radiographic procedures are discussed. Students will also learn how different pathology influences radiographic image and technique.

**Prerequisites:** RTE 1205, RTE 1205L, RTE 1206 & RTE 1030

**RTE 2015 - Radiographic Biology and Protection  3 Credits  45 clock hours**
The course is designed to educate students on the principles of radiation protection. Students will be lectured on the responsibilities of the radiographer to patients, other personnel, and the public. Radiation health and safety requirements of federal and state regulatory agencies are incorporated. The course is also designed to provide students with an overview of the principles of the interaction of radiation to the body systems. Fundamental principles of molecular and cellular responses to radiation will be learned, including acute and chronic effects of radiation.

**Prerequisites:** BSC 1086 & 1086L, RTE 1205 & 1205L, RTE 1026

**RTE 2025 - Cross Sectional Anatomy/Advanced Modalities  3 Credits  45 clock hours**
Students will learn sectional anatomy to develop a realistic understanding of 3-dimensional sense of anatomy of the head, neck, thorax, abdomen, and pelvis. Students will acquire basic principles, image appearance and education/certificate for Ultrasound, MRI, Nuclear Medicine/PET, Angiography and Radiation Therapy. Students will also acquire a basic understanding of Computed Tomography.

**Prerequisites:** RTE 1206, RTE 1206L, RTE 1026 & RTE 1030

**RTE 1270 – Clinical I  5 Credits  240 clock hours**
Introduces students to the clinical setting and provides an opportunity for students to observe and participate in radiographic procedures, with emphasis on specific structures. All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required and elective competencies in the area of abdomen, chest and upper extremity.

**Prerequisites:** BSC 1085, BSC 1085L, RTE 1202 & RTE 1202L

**RTE 1280 - Clinical II  5 Credits  240 clock hours**
Introduces students to the clinical setting and provides an opportunity for students to observe and participate in radiographic procedures, with emphasis on specific structures. All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required and elective competencies in the content covered in the prior semester.

**Prerequisites:** BSC 1086, BSC 1086L, RTE 1270, RTE 1030, RTE 1203 & RTE 1203L

**RTE 2005 - Clinical III  8 Credits  360 clock hours**
Introduces students to the clinical setting and provides an opportunity for students to observe and participate in radiographic procedures, with emphasis on specific structures.
All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required and elective competencies in the area covered in the prior semester.

**Prerequisites:** BSC 1086, BSC 1086L, RTE 1204, RTE 1204L, RTE 1280 & RTE 1025

**RTE 2010 - Clinical IV**

8 Credits 360 clock hours

Introduces students to the clinical setting and provides an opportunity for students to observe and participate in radiographic procedures, with emphasis on specific structures.

All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required in the content covered in the prior semester.

**Prerequisites:** BSC 1086, BSC 1086L, RTE 1205, RTE 1205L, RTE 2005 & RTE 1026

**RTE 2020 - Clinical V**

8 Credits 360 clock hours

Introduces students to the clinical setting and provides an opportunity for students to observe and participate in radiographic procedures, with emphasis on specific structures. All activities of students are under the supervision of a designated site clinical instructor or designee. Emphasis is placed on the demonstration of proficiency in required and elective competencies in the prior semester.

**Prerequisites:** BSC 1086, BSC 1086L, RTE 1206, RTE 1206L, RTE 2010 & RTE 2015

**RTE 2500 - Senior Registry Review**

3 Credits 45 Clock Hours

This Course provides a review of basic knowledge from previous courses and helps the student prepare for national certification examination for radiographers. Topics include: principles of radiographic exposure, radiographic procedures, anatomy, physiology, pathology, terminology, radiographic equipment, radiation protection, and patient care techniques.

**Prerequisites:** RTE 1206, RTE 1206L, RTE 2015 & RTE 1026

**RTE 1201 Introduction to Radiologic Sciences**

3 Semester Credits 45 Lecture hours

Content provides a foundation in ethics and law related to the practice of medical imaging. An introduction to terminology, concepts and principles will be presented. Students will examine a variety of ethical and legal issues found in clinical practice. Content provides an overview of the foundations of radiography and the practitioner’s role in the health care delivery system. Principles, practices and policies of health care organizations are examined and discussed in addition to the professional responsibilities of the radiographer. Content provides the concepts of optimal patient care, including consideration for the physical and psychological needs of the patient and family. Routine and emergency patient care procedures are described, as well as infection control procedures using standard precautions. The role of the radiographer in patient education is identified.

**Prerequisites:** None
Radiation Therapy Program
2655 Hours
105 Credits
98 weeks
Credential Awarded: Associate of Science Degree
Type of Instructional Delivery: Blended

PROGRAM DESCRIPTION/PROGRAM OBJECTIVES
The Radiation Therapy Program is 98 weeks in length. It is designed to provide a well-planned didactic and clinical education experience to enable students to become competent, entry-level radiation therapists upon graduation. The curriculum has been developed in accordance with the guidelines established by the American Society of Radiologic Technologists (ASRT). The clinical competency requirements have been developed in accordance with ARRT (American Registry of Radiologic Technologists) guidelines.

During the first semester of the program, students attend classes and receive laboratory instruction. Beginning with the second semester of the program, students will start their clinical externship assignments. During their first year of training, clinical externships will be assigned two days per week. During the second year of training, clinical externships will be assigned three days per week. Radiation Program Curriculum Includes:

Course descriptions:

**CTS 1050 - Introduction to Computers**  
3 credits  
45 clock hours (online)  
In this course students will learn the basic operation of Microsoft Word, Excel and PowerPoint. Students will learn proper techniques for business letter-writing and resume-writing.  
**Prerequisites:** None

**ENC 1101 - English Composition**  
3 credits  
45 clock hours (online)  
Students will be taught the proper use of grammar, punctuation and usage skills that are used in everyday language. The goals of effective writing will be covered as well as essay preparation. Students will take several mastery and editing tests as part of the course. Students will review readings for writing, to aid in essay preparation and completion.  
**Prerequisites:** None

**HSC 1000 - Introduction to Health Science**  
3 credits  
45 clock hours (online)  
Students will examine the following topics: The healthcare professions and teams, interactions between and reactions of patients in altered physical &/or mental states including gerontology and diverse cultures, professionalism and professional organizations, vital signs, OSHA standards, asepsis and isolation techniques including universal precautions, ethics and legal concerns of the healthcare provider, lifting/moving/body mechanics, patient and environmental emergency assessment and response, and Basic Cardiac Life Support (BCLS). The student will possess the aptitude to comprehend and use information in both written and oral formats.  
**Prerequisites:** None

**MAC 1105 - College Algebra**  
3 Credits  
45 clock hours  
Students in this course will explore college algebra through a detailed examination of practical applications. Students will calculate algebraic problems with linear equations, exponential functions, polynomials, factors and rational expressions. Students will solve problems using graphs, slopes, inequalities, linear equations, roots, radicals and quadratic equations.
**Prerequisites:** None

**MEA 1239 - Medical Terminology**  
2 credits 30 clock hours (online)  
This course will provide students with instruction in how to decipher useful medical terminology into everyday language. Students analyze and learn prefixes and suffixes, spelling use and correct pronunciation. Medical abbreviations and symbols are included.  
**Prerequisites:** None

**PSY 1012 - Introduction to Psychology**  
3 credits 45 clock hours (online)  
This course offers students the basic principles of human behavior. Students will discuss challenges, responsibilities, problems and satisfaction of being a health care provider and relate this to the theories of human behavior and personality development.  
**Prerequisites:** None

**SPC 1016 - Fundamentals of Speech**  
3 credits 45 clock hours (online)  
Students will learn the foundations of communication including public presentations and interviewing skills. Emphasis will be placed on motivational speaking.  
**Prerequisites:** None

**BSC 1085 - Anatomy & Physiology I**  
3 credits 45 clock hours (online)  
This course will offer students the opportunity to learn about the structure and function of the human body. The concepts of cells, tissues, organs and systems are presented to form the framework for a comprehensive study of anatomic structures and basic functions of each body system. In addition, the concepts of biochemistry will be discussed. Also provided will be the concepts of structural anatomy as students analyze the complex functions of each system.  
**Prerequisites:** None

**BSC 1085L - Anatomy & Physiology I Lab**  
1 credit 30 clock hours  
In an online delivery students in this course will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved. Anatomy and Physiology I will focus on the cells, cell metabolism, tissues and membranes, integumentary system and body temperature, skeletal system, muscular system, nervous system tissue and brain, nervous system spinal cord & peripheral nerves, autonomic nervous system and endocrine system.  
**Prerequisites:** None

**BSC 1086 - Anatomy & Physiology II**  
3 credits 45 clock hours (online)  
This course is a continuation of BSC 1085 lecture. Students will continue to will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved.  
**Prerequisites:** BSC 1085
BSC 1086L - Anatomy & Physiology II Lab 1 credit 30 clock hours
Students will explore the structure and function of tissues and organs in a laboratory setting. This will include visiting the office of the Medical Examiner, Video web cast of dissections and autopsies.
Prerequisites: BSC 1085, BSC 1085L & MEA 1239

RAD 1000A - Orientation to Radiation Therapy & Medical Ethics 3 credits 45 clock hours
This course is designed to provide the student with an overview of the foundations in radiation therapy and the therapist’s role in the health care delivery system. The principles, practices and policies of the CIAHT educational program, health care organizations, principles of radiation and health safety and professional responsibilities of the radiation therapist will be covered in this course. This course also provides sequential development, application, analysis, integration, synthesis and evaluation of concepts and theories in radiation therapy. Concepts of team practice,

Patient-centered clinical practice and professional development shall be discussed, examined and evaluated. Problem-solving will be utilized along with critical thinking skills in discussion of the source of law, causes of action and litigation processes related to the professional practice of radiation therapy. The ethical stands and standards of law will be compared and examined.
Prerequisites: None

RAD 1001A - Introduction to Clinical Radiation Therapy & Operations 4 credits 60 clock hours
This course will introduce the students to the clinical setting. Personnel and responsibilities will be discussed with regard to each person involved with patients and their care. Equipment utilized and safe operation of equipment will be discussed. The proper and ethical behaviors of students and personnel in the clinical setting will be demonstrated via role play and discussion groups. The psychological aspects of patient reactions and fears will be discussed with regard to the waiting room, treatment room and personnel they will meet. This course will prepare students for clinical externships beginning the second semester of the program.
This course also focuses on various Radiation Therapy operational issues. Continued quality improvement issues are discussed and evaluated and assessment techniques will be emphasized. Human resource regulations impacting the radiation therapist will be examined. Accreditation agencies and the radiation therapist’s role in the accreditation process will be discussed. Billing and reimbursement issues pertinent to the radiation therapy department will be presented.
Basic Cardiac Life Support for the Health Care Provider will also be provided involving training in risk factors of heart disease, recognition of a heart attack and choking victim. Activating the emergency medical services system and managing the unconscious victim with rescue breathing using airway adjuncts/ventilation devices along with the automated external defibrillator educational course. Adult, child and infant cardio pulmonary resuscitation and obstructed airway instruction for the one-rescuer and two-
rescuer team will be covered.

**Prerequisites:** None

---

**RAD 1002A - Radiation Therapy Patient Care** 3 credits  45 clock hours

The student will be provided with concepts in assessment and evaluation of the patient for delivery of radiation therapy. Psychological and physical needs and factors affecting treatment outcome will be presented and examined. Routine and emergency care procedures will be presented.

**Prerequisites:** BSC 1085, BSC 1085L, MEA 1239, RAD 1000A & RAD 1001A

---

**RAD 1003A - Radiation Physics I** 4 credits  60 clock hours

This course provides students with an understanding of the concepts of general physics. It then develops into an understanding of radiations used in the clinical setting. Fundamental physical units, measurements, principles, atomic structure and types of radiation are emphasized. Also presented are the fundamentals of x-ray generating equipment, x-ray production and its interactions with matter.

**Prerequisites:** RAD 1000A & RAD 1001A

---

**RAD 1004A - Radiation Physics II & Quality Management** 4 credits  60 clock hours

This course is a continuation of RAD 1003A and is designed to review and expand concepts and theories in the radiation physics I course. Detailed analysis of the structure of matter, properties of radiation, nuclear transformations, x-ray production and interactions of ionizing radiations are emphasized. The student is also presented with treatment units used in external beam radiation therapy, measurement and quality of ionizing radiation produced, absorbed dose measurement, dose distribution and scatter analysis.

This course is also designed to focus on the evolution of quality management programs and continuing quality improvement in radiation oncology. Students will examine the need for quality assurance checks, quality assurance of the clinical aspects and chart checks, film checks, the various types of evaluations and tests performed on simulators, megavoltage therapy equipment and therapy planning units, the role of radiation therapists in quality management programs. Legal and regulatory implications for maintaining appropriate quality management guidelines as well as the role of computers and information systems are discussed as they serve within the radiation oncology department. As part of this course, students will be required to document competency in performing daily treatment machine checks as part of their clinical competency requirements.

**Prerequisites:** MAC 1105, RAD 1005A RAD 1003A, RAD 1008A

---

**RAD 1005A - Radiation Biology & Protection** 3 credits  45 clock hours

This course will present the basic principles of radiation protection and safety for the radiation therapist. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and health care organizations are included. The specific responsibilities of the radiation therapist are discussed, examined, performed
and evaluated. The student will also be presented with basic concepts and principles of radiation biology; the interactions of radiation with cells, tissues and the body as whole and resultant biophysical events will be presented. Discussion of the theories and principles of tolerance dose, time-dose relationships, fractionation schemes and the relationship to the clinical practice of radiation therapy will be discussed, examined and evaluated.

**Prerequisites:** BSC 1085, BSC 1085L, BSC 1086, BSC 1086L, MEA 1239, RAD 1002A, RAD 1003A

**RAD 1008A - Sectional Anatomy & Principles of Imaging** 3 credits 45 clock hours

The student is introduced to a knowledge base in factors that govern and influence the production and recording of radiographic images for patient simulation, treatment planning and treatment verification in radiation oncology. Radiation oncology imaging equipment and related devices will be emphasized. This course will also provide the student the opportunity to study normal sectional anatomy utilizing diagrams and radiologic images. Guest speakers will be invited to demonstrate the different imaging modalities utilized for diagnosis.

**Prerequisites:** BSC 1085, BSC 1085L, BSC 1086, BSC 1086L, MEA 1239, RAD 1002A, RAD 1003A

**RAD 1009A - Principles and Practice of Radiation Therapy I** 4 credits 60 clock hours

In this course the student is provided with an overview of cancer and the specialty of radiation therapy. The medical, biological and pathological aspect as well as the physical and technical aspects will be discussed. The role and responsibility of the radiation therapist, the treatment prescription, the documentation of treatment parameters and delivery will also be discussed.

**Prerequisites:** MEA 1239, RAD 1005A RAD 1003A, RAD 1008A

**RAD 1010A - Principles and Practice of Radiation Therapy II** 3 credits 45 clock hours

This course is a continuation of RAD 1009A. The course is designed to examine and evaluate the management of neoplastic disease while promoting critical thinking skills and the basis of ethical clinical decision-making. The epidemiology, etiology, detection, diagnosis, patient condition, treatment and prognosis of neoplastic disease will be presented for each organ and system. This will be discussed and evaluated in relationship to histology, anatomical site and patterns of spread. The radiation therapist’s role in the management of neoplastic disease will also be examined and linked to the skills required to analyze complex issues and make informed decisions while appreciating the character of the profession.

**Prerequisites:** MEA 1239, RAD 1004A, RAD 1009A

**RAD 2000A - Treatment Planning I** 3 credits 45 clock hours

The content of this course is designed to establish factors that influence and govern clinical treatment planning of patient treatment. Encompassed are isodose distributions,
patient contouring, and radiobiologic considerations.

**Prerequisites:** MAC 1105, RAD 1004A, RAD1009A

**RAD 2001A - Treatment Planning II**  
3 credits  
45 clock hours

This is a continuation of RAD 2000A. Students will be required to make dosimetric calculations, utilizing compensating filters, blocking considerations and other treatment accessories. Clinical application of treatment beams will be taken into consideration and optimal treatment planning will be emphasized along with particle beams. Stereotactic and emerging technologies will also be presented. Coincidental with this course, students will be provided with a clinical rotation in the radiation dosimetry department to work with radiation physicists to observe and participate in the computerized treatment planning process.

**Prerequisites:** MAC 1105, RAD 1010A, RAD 2000A

**RAD 2002A - Oncologic Pathology**  
3 credits  
45 clock hours

This course provides the student with an introduction into the general pathology of cancer. It introduces the basic disease concepts, theories of disease etiology and the pathologic disorders of each system most frequently encountered in clinical practice. Also provided to the student is an in-depth study of new and abnormal development of cells in the cancer process. The student is introduced into the processes involved in the development and classification of both benign and malignant tumors and site-specific information on malignant tumors.

**Prerequisites:** MEA 1239, RAD 1010A, RAD 2000A

**RAD 2006A - Radiation Therapy Seminar**  
3 credits  
45 clock hours

Course is designed to synthesize previous coursework and integrate didactic and clinical concepts. Various Instructors will present interactive lectures, reviews and comprehensive exams based on all course topics and materials covered throughout the two year program. Instructors will emphasize the application process, completion of the programmatic requirements and practice computerized simulations of the registry exam based on the outline in the Radiation Therapy Certification Handbook.

**Prerequisites:** BSC 1085, BSC 1085L, BSC 1086, BSC 1086L, MAC 1105, MEA 1239, HSC 1000, CTS 1050, PSY 1012, SPC 1016, RAD 1000A, RAD 1002A, RAD 1003A, RAD 1004A, RAD 1005A, RAD 1008A, RAD 1009A, RAD 1010A, RAD 2000A

**RAD 1006A - Clinical Externship I**  
5 credits  
240 clock hours

The student will rotate through nursing, simulation and treatment. The student will participate in routine procedures under the direct supervision of a registered radiation therapist. The student will develop competence in basic patient care skills as well as basic simulation and treatment setups.

**Prerequisites:** BSC 1085, BSC 1085L, MEA 1239, RAD 1000A, RAD 1001A

**RAD 1007A - Clinical Externship II**  
5 credits  
240 clock hours

The student will rotate through nursing, simulation and treatment. The student will participate in routine procedures under the direct supervision of a registered radiation therapist. The student will develop competence in basic patient care skills as well as
basic simulation and treatment setups.

**Prerequisites:** RAD 1000A, RAD 1001A, RAD 1002A, RAD 1003A, RAD 1006A

**RAD 2007A - Clinical Externship III** 8 credits 360 clock hours
The student will be introduced to the general operations of a radiation oncology department including equipment used for simulation and treatment, patient flow, and roles and responsibilities of the healthcare team that comprises the staff.

**Prerequisites:** RAD 1000A, RAD 1001A, RAD 1002A, RAD 1003A, RAD 1005A, RAD 1006A, RAD 1007A

**RAD 2008A - Clinical Externship IV** 8 credits 360 clock hours
The student will be introduced to the general operations of a radiation oncology department including equipment used for simulation and treatment, patient flow, and roles and responsibilities of the healthcare team that comprises the staff. The student will develop competence in basic patient care skills, as well as, dosimetry, simulation and treatment setups

**Prerequisites:** RAD 1000A, RAD 1001A, RAD 1002A, RAD 1003A, RAD 1004A, RAD1005A, RAD 1006A, RAD 1007A, RAD 1008A, RAD 1009A, RAD 2007A

**RAD 2009A - Clinical Externship V** 8 credits 360 clock hours
The student will be introduced to the general operations of a radiation oncology department including equipment used for simulation and treatment, patient flow, and roles and responsibilities of the healthcare team that comprises the staff.

Nursing Program

1725 Hours
77 Semester Credits
96 Instructional Weeks
Credential Awarded: Associate of Science Degree
Type of Instructional Delivery: Blended

PROGRAM DESCRIPTION/PROGRAM OBJECTIVES

The Associate in Science Nursing program at Cambridge College of Healthcare & Technology is designed to provide training and education in order to prepare graduates to plan, deliver, and manage patient care as registered nurses in a variety of settings. The program offers students the opportunity to learn to effectively function as an integral part of the interdisciplinary team in a complex healthcare delivery system. At the completion of the program, graduates who have attended class and their clinical rotations, studied, and practiced their skills should have the ability to make successful application for state licensure and, upon passing the required state examination, to seek entry-level employment as registered nurses.
The requirements of the Program for graduation are as follows:

Completion of all program courses with a satisfactory grade of 75% or above in theory and a passing grade in all clinical courses

Completion with an earned grade point average of 2.8 or above

Tuition accounts satisfied

Completion of a practice NCLEX-RN exam with a minimum passing score of 75%.

If below 75%, evidence of remediation in identified areas is necessary.

Course Descriptions

BSC 1085 - Anatomy & Physiology I          3 Credits 45 Clock Hours

In this course will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved. Anatomy and Physiology I will focus on the cells, cell metabolism, tissues and membranes, integumentary system and body temperature,
skeletal system, muscular system, nervous system tissue and brain, nervous system spinal cord & peripheral nerves, autonomic nervous system and special senses.

Prerequisites: None

BSC 1085L - Anatomy & Physiology I Lab 1 Credit 30 Clock Hours
Students will explore the structure and function of tissues and organs in a laboratory setting.
Co-requisite: BSC 1085

BSC 1086 - Anatomy & Physiology II 3 Credits 45 Clock Hours
This course is a continuation of BSC 1085 lecture. Students will continue to will explore the human body as a whole, its levels or organization, the terms used in describing body structure and directional terms, homeostatic mechanisms, the relationship of structure and function and how they relate to each other and homeostasis as directed by each body system involved. Anatomy and Physiology I will focus on the endocrine system, cardiovascular system, including blood circulation, heart anatomy and electrical conduction and disease, lymphatic system, respiratory system, gas exchange, digestion, excretory, urinary, male and female reproduction systems.
Prerequisites: BSC1085, BSC1085L

BSC 1086L - Anatomy & Physiology II Lab 1 Credit 30 Clock Hours
Students will explore the structure and function of tissues and organs in a laboratory setting. This will include visiting the office of the Medical Examiner, Video web cast of dissections and autopsies.
Prerequisites: BSC1085, BSC 1085L; Co-requisite BSC1086

CTS 1050 - Introduction to Computers 3 Credits 45 Clock Hours
Students will learn the basic operation of Microsoft Word, Excel, and PowerPoint. Student will learn proper techniques for business letter writing and resume writing.
Prerequisites: None

ENC 1101 - English Composition 3 Credits 45 Clock Hours
Students will learn grammar, punctuation and usage skills that are useful in everyday language. The goals of effective writing will be covered as well as essay preparation.
Students will take several mastery and editing tests as part of the course.
HSC 1000 - Introduction to Health Science 3 Credits 45 Clock Hours

Students will examine the following topics: The healthcare professions and teams, interactions between and reactions of patients in altered physical &/or mental states including gerontology and diverse cultures, professionalism and professional organizations, vital signs, OSHA standards, asepsis and isolation techniques including universal precautions, ethics and legal concerns of the healthcare provider, lifting/moving/body mechanics, patient and environmental emergency assessment and response, and Basic Cardiac Life Support (BCLS). The student will possess the aptitude to comprehend and use information in both written and oral formats.

Prerequisites: None

MAC 1105 - College Algebra 3 Credits 45 Clock Hours

Students in this course will explore college algebra through a detailed examination of practical applications. Students will calculate algebraic problems with linear equations, exponents, polynomials, factors, and rational expressions. Student will solve problems using graphs, slopes, inequalities, linear equations, roots, radicals and quadratic equations.

Prerequisites: None

MEA 1239 - Medical Terminology 2 Credits 30 Clock Hours

This course will provide students with instruction in how to decipher useful medical terminology into everyday language. Students analyze and learn prefixes and suffixes, spelling use and correct pronunciation. Medical abbreviations and symbols are included.

Prerequisites: None

MIC150 – Microbiology 3 Credits 45 Clock Hours

This is an introduction course emphasizing the classification, physiology, and pathology of microorganisms.

Prerequisites: None

MIC150L – Microbiology Lab 1 Credit 30 Clock Hours

Students will explore the classification, physiology, and pathology of various microorganisms.

Prerequisites: None; Co-requisites: MIC150
NUR111 – Nursing Concepts 1 Credit 15 Clock Hours

Nursing Concepts introduces nursing as a caring, holistic and critically thinking profession. Studying the historical nursing perspectives, Nightingale through modern holistic, and concepts critical to professional nursing are traced. Theories of the profession will be explored and an emphasis placed on the theory of Dorothea Orem as a method for organizing thinking and nursing practice. Concepts that shape a profession like healthcare delivery systems, ethical considerations, professional behaviors and values are also considered. And, concepts necessary to provide nursing care like: the nursing process, therapeutic communications, teaching/learning processes, advocacy, interdisciplinary teamwork and the health/illness continuum are examined. Throughout the course, students have the opportunity to identify their own learning styles and begin to create strategies for positive learning and personal wellness.

Prerequisites: None

NUR112 – Nursing Fundamentals 3 Credits 45 Clock Hours

The emphasis in Nursing Fundamentals is on the normal foundations necessary for a nurse to apply critical thinking processes during both health and illness. The theory of Dorothea Orem and the conceptual framework of the program are integrated with foundational nursing concepts as a means of exploring normal human functioning. Areas discussed include: assessment, diagnostic and pharmacological resources, accountability through documentation, and, foundational concepts for normal human functioning and wellness.

Prerequisites: BSC1085, BSC1086.

NUR112C – Nursing Fundamentals Clinical 2 Credits 90 Clock Hours

Nursing Fundamentals Clinical provides selected patient experiences in a variety of settings and assists the student to incorporate both theory and college lab skills. The clinical focus is on the practice of assessment, diagnostic and pharmacological resources, accountability through documentation, and foundational concepts for normal human functioning and wellness within this practice, the student identifies self-care deficits and therapeutic demands for patients with commonly occurring health limitations.

Prerequisites: BSC1085, BSC1086, NUR111; Co-requisites: NUR112

NUR112L – Nursing Fundamentals Lab 1 Credit 30 Clock Hours

Nursing Fundamentals Lab presents an introduction to basic technical nursing skills sets that are either utilized or delegated by the nurse to implement the nursing process. While
practicing basic patient care skills students find a supportive and supervised environment where increasing confidence and competence is encouraged.

Prerequisites: BSC1085, BSC1086, NUR111; Co-requisites: NUR112

NUR123 – Medical/Surgical Nursing I
3 Credits 45 Clock Hours

This course builds on the foundations of nursing by considering stressors that affect an individual’s level of wellness by inflicting intermediary self-care physical and/or mental limitations. Stressors explored will include, but are not limited to, commonly occurring health limitations that alter one’s state of wellness and thus require therapeutic nursing demands for self-care and a change in one’s wellness status. Critical thinking models for human functioning and independent nursing interventions will be further explored and expanded to include detailed nursing processes, care management, interdisciplinary healthcare team approaches and holistic considerations for selected stressors.

Prerequisites: MIC150, MIC150L, NUR112, NUR112C, NUR112L, NUR145, NUR146, NUT180

NUR123C – Medical/Surgical Nursing I Clinical
2 Credits 90 Clock Hours

Medical/Surgical Nursing I Clinical provides selected patient experiences in a variety of settings and assists the student to incorporate both theory and college lab skills. The clinical focus is on the practice of beginning medical/surgical technical nursing skill sets that are utilized or delegated by the nurse. Within this practice, the student identifies self-care deficits and therapeutic demands for patients with commonly occurring health limitations.

Prerequisites: MIC150, MIC150L, NUR112, NUR112C, NUR112L, NUR145, NUR146, NUT180; Co-requisite: NUR123

NUR123L – Medical/Surgical Nursing I Lab
1 Credit 30 Clock Hours

Medical Surgical Nursing I Skills Laboratory provides the knowledge and practice for beginning medical/surgical nursing skills sets that are used by the nurse to implement the nursing process and manage care. Students find a supportive and supervised environment where increasing confidence and competence is encouraged while practicing medical/surgical patient care skills.

Prerequisites: MIC150, MIC150L, NUR 112, NUR112C, NUR112L, NUR145, NUR146, NUT180; Co-requisite: NUR123
NUR145 – Pharmacology in Nursing Practice I 2 Credits 30 Clock Hours

Pharmacology in Nursing Practice I assists the beginning professional nursing student to understand pharmacotherapeutic concepts that are necessary for safe adult medical/surgical nursing practice. The major drug classifications are introduced in the context of human functioning and self-care deficits. For each classification the student considers: data collection, dosage/administration, evaluating and maximizing therapeutic effects, minimizing adverse reactions/interactions, managing toxicity and patient education.

Prerequisites: BSC1085, BSC1085L, BSC1086, BSC1086L, MAC1105

NUR146 – Pharmacology in Nursing Practice II 1 Credit 15 Clock Hours

Pharmacology in Nursing Practice assists the professional nursing student to understand pharmacotherapeutic concepts that are necessary for safe administration of medications for pediatric, reproductive health and advanced medical/surgical nursing practice. The major drug classifications, in the context of human functioning and self-care deficits, are reinforced. For each classification the student considers: data collection, dosage/administration, evaluating and maximizing therapeutic effects, minimizing adverse reactions/interactions, managing toxicity, patient education, managing IV therapy, chemotherapy, and blood administration.

Prerequisites: NUR145

NUR163 – Maternal-Child Nursing 3 Credits 45 Clock Hours

Maternal Child Health Nursing introduces the student to the components of nursing for women and children that address self-care limitations imposed by pregnancy, childbirth, new life (including congenital defects), age related growth, developmental, and health promotion limitations. Through the use of human functioning concepts and nursing processes for thinking, the keys to holistic nursing care are delineated by the concepts of assessment, communications, clinical decision-making, managing, collaborating, and teaching/learning and wellness. The nurse’s role in assessment for abuse and neglect and risk factors are discussed.

Prerequisites: NUR112, NUR112C, NUR 112L, NUR123, NUR123C, NUR123L

NUR163C - Maternal-Child Nursing Clinical 2 Credits 90 Clock Hours

Maternal Child Health Clinical provides selected experiences in obstetric and pediatric settings that assist the student to integrate content from the classroom with the nursing care of child-bearing women, children and their families. The focus, in these settings, is on the holistic nursing care and accompanying technical skill sets that are used by the nurse to implement the nursing process for normal self-care limitations due to childbearing or development. Keys to care include assessments, communications, teaching/learning,
interdisciplinary and community partnering, and managing care. Clinical experiences will occur in out-patient clinics, physician’s offices, health department clinics, birthing centers and/or hospitals.

Prerequisites: NUR112, NUR112C, NUR 112L, NUR123, NUR123C, NUR123L
Co-requisite: NUR163

NUR212 – Integrated Medical/ Surgical Nursing I 3 Credits 45 Clock Hours

Integrated Medical/Surgical Nursing 1 focuses on self-care limitations that are common to both adults and children. Stressors are explored through nursing diagnosis categories and include commonly occurring health limitations that alter one’s view of wellness and require therapeutic nursing demands for self-care. Critical thinking models for human functioning and independent nursing interventions will continue to be explored for adults and children.

Examples of limitations include, but are not limited to, anemia, cancer, cardiac issues, nephrotic conditions, asthma, fractures, seizures, and, rashes. End of life issues are discussed.

Prerequisites: NUR123, NUR123C, NUR123L

NUR212C – Integrated Medical/ Surgical Nursing I Clinical 2 Credits 90 Clock Hours

Integrated Medical/Surgical Nursing 1 Clinical provides selected pediatric and adult patient experiences in a variety of settings. It assists students to incorporate both theory and college lab skills. The clinical focus is on the practice of technical nursing skill sets that are utilized or delegated by the nurse. Within this practice, the student identifies self-care deficits and therapeutic demands for patients and/or families with commonly occurring health limitations and designs nursing care. Examples of limitations include, but are not limited to conditions of: anemia, cancer, cardiac and nephrotic dysfunction, asthma, fractures, seizures, and, skin rashes.

Prerequisites: NUR123, NUR123C, NUR123L Co-requisite: NUR212

NUR212L – Integrated Medical/ Surgical Nursing I Lab 1 Credit 30 Clock Hours

Integrated Medical Surgical Nursing 1 Skills Laboratory provides the knowledge and practice for medical/surgical nursing skills sets that are used by the nurse to implement the nursing process and manage care for adults and children. Students find a supportive and supervised environment where increasing confidence and competence is encouraged while practicing medical/surgical patient care skills.

Prerequisites: NUR123, NUR123C, NUR123L Co-requisite: NUR212

NUR213 - Integrated Medical/ Surgical Nursing II 3 Credits 45 Clock Hours
Integrated Medical /Surgical Nursing II focuses on self-care limitations that are common to both adults and children. Stressors are explored through nursing diagnosis categories and include complex, multi-system failure health limitations that alter one’s view of wellness and require therapeutic nursing demands for self-care. Critical thinking models for human functioning and independent nursing interventions will continue to be explored for adults and children. Examples of limitations include, but are not limited to, hepatitis, HIV/AIDS, organ transplants, shock, sepsis, spinal cord injury, thyroid issues, Alzheimer’s, loss of senses.

Prerequisites: NUR212, NUR212C, NUR212L

NUR213C - Integrated M/S Nursing II Clinical 2 Credits 90 Clock Hours

Integrated M/S Nursing Clinical 2 provides selected pediatric and adult patient experiences in a variety of settings. It assists students to incorporate both theory and college lab skills.

The clinical focus is on the practice of technical nursing skill sets that are utilized or delegated by the nurse when caring for patients with complex, multi-system failure health limitations. Stressors are explored through the nursing diagnosis categories and include centering of mental, cultural and spiritual aspects of one’s view of wellness and altered self-care status. Critical thinking models for human functioning and independent nursing interventions will continue to be explored for adults and children. Examples of limitations include, but are not limited to, hepatitis, HIV/AIDS, organ transplants, shock, sepsis, spinal cord injury, thyroid issues, Alzheimer’s, and loss of senses.

Prerequisites: NUR212, NUR212C, NUR212L Co-requisite: NUR213

NUR220 – Mental Health Nursing 2 Credits 30 Clock Hours

Mental Health Nursing introduces the student to the stressors that impose transitional self-care mental and/or social limitations. Psychosocial nursing tools and intervention modalities are expanded. The DSM-IV-TR classification system is introduced for moderate, severe, psychotic, and, emergency issues. Through the use of human functioning concepts and nursing processes for thinking, the keys to holistic nursing care are delineated, implemented and evaluated. Selected stressors include, but are not limited to commonly occurring mental health limitations that lead to therapeutic self-care demand(s) that require partnering.

Individuals and families are assisted in defining and accepting an altered mental perception in order to maintain wellness. Nurse’s role in assessment for abuse and neglect of the mentally ill are explored. Community resources for assistance are explored.

Prerequisites: NUR112, NUR112C, NUR112L, NUR123, NUR123C, NUR123L

NUR220C – Mental Health Nursing Clinical 2 Credits 90 Clock Hours
Mental Health Nursing Clinical affords the student an opportunity to explore, for individuals and groups, the stressors that impose transitional self-care mental and/or social limitations. Psychosocial nursing skill sets and the development of a plan of care (case management) with the interdisciplinary healthcare team are practiced. After assessment, students use the DMS-IV-TR, NIC and NOC classifications and NANDA nursing diagnosis to assist patients re-gain or find a new level of wellness. Therefore, clinical facilities include in-patient and out-patient opportunities.

Prerequisites: NUR112, NUR112C, NUR112L, NUR123, NUR123C, NUR123L
Co-requisite: NUR220C

NUR243C – Nursing Preceptorship 3 Credits 135 Clock Hours

The Nursing Preceptorship builds on the knowledge and skills obtained in the nursing curriculum and integrate the theory of organizational development and culture, management styles and beginning leadership skills into the clinical practice of nursing. The course provides the foundations for independent clinical practice by assisting the student to prepare for employment as a registered nurse. Students work with an assigned clinical preceptor.

Preceptors directly mentor the student throughout the course. At completion, the student is expected to be confident and competent in handling all aspects of the average patient load for that agency.

Prerequisites: NUR213, NUR213C

NUR250 – Advanced Maternal/Infant Nursing 2 Credits 30 Clock Hours

Advanced Maternal Infant Nursing introduces the student to the components of nursing for “high risk” women and infants. It addresses complex self-care limitations imposed by pregnancy, childbirth and new life for the individual and family. Through the use of human growth, development, and functioning concepts and nursing processes for thinking, the keys to holistic nursing care are delineated by the concepts of assessment, communications, clinical decision-making, managing, collaborating, and teaching/learning and wellness.

Individuals and families are assisted in accepting an altered perception in order to maintain wellness.

Prerequisites: NUR163, NUR163C

NUR250C - Advanced Maternal/Infant Nursing Clinical 1 Credit 45 Clock Hour

Advanced Maternal/Infant Nursing Clinical provides selected experiences in obstetric and newborn settings that assist the student to integrate content from the classroom with the nursing care of high risk child-bearing women, infants and their families. The focus, in these settings, is on the holistic nursing care and accompanying technical skill sets that are used by the nurse to implement the nursing process for high risk self-care limitations due to
alternations during childbearing or the neonatal period. Keys to care include assessments, communications, teaching/learning clinical decision-making, managing, collaborating, interdisciplinary and community partnering, and wellness. Clinical experiences will occur in out-patient clinics, physician’s offices, health department clinics, and hospitals.

Prerequisites: NUR163, NUR163C Co-requisite: NUR250

NUT180 – Nutrition 3 Credits 45 Clock Hours
This is an introduction to the fundamentals of nutrition and how they relate to the promotion and maintenance of optimal health. This course includes a presentation of the practical applications of the current principles of nutrition and diet therapy in the prevention and treatment of nutrition-related pathologies, as well as a discussion of socioeconomic, religious, and cultural influences on nutrition.

Prerequisites: None

PSY 1012 – Psychology 3 Credits 45 Clock Hours
In this course, students learn basic principles of human behavior. Challenges, responsibilities, problems and satisfactions of being a health care provider are discussed. Theories of human behavior and personality development are included.

Prerequisites: None

SPC 1016 – Speech 3 Credits 45 Clock Hours
Students will learn the foundations of communications including public presentations and interviewing skills.

Prerequisites: None
Practical Nursing

Diploma Program

Method of Delivery - Residential

54 weeks - Days

85 weeks - Evenings

1350 clock hours

Program Objective/Program Description
The Practical Nurse program offers preparation in the knowledge and clinical skills for students to enter the Practical Nursing field. Students in this program are conditioned to take the NCLEX-PN examination required for employment as an entry-level Licensed Practical Nurse (LPN). Practical Nursing experiences include theoretical instruction and clinical experience in medical, surgical, obstetric, pediatric, and geriatric nursing and respective clinical rotations in both acute and long-term care situations. Theoretical instruction of the clinical application of the vocational role and function and personal, family and community health concepts, nutrition, human growth and development over the lifespan, body structure and function, interpersonal relationship skills, mental health concepts, pharmacology and administration of medications, legal aspects of practice, Health Careers Core, Basic Life Support (BLS and CPR) for health-care providers, and current issues in nursing are all components of the program. Practical Nurses are employed in a variety of healthcare settings including hospitals, ambulatory care settings, long-term care facilities, home health agencies, private duty opportunities, and other appropriate medical areas. Upon program completion, graduates are eligible to take NCLEX-PN credentialing examination.

COURSE DESCRIPTIONS

Theoretical Instruction & Lab Courses, Clinical Experience

PN 100 Health Care

90 clock hours

This course covers the Core and the competencies of basic knowledge necessary in the health occupations career. It includes basic communication skills; math and science, employability skills, safety practices, legal and ethical responsibilities, knowledge of the health care system as a whole, principles of infection control, first aid, and basic patient care competencies.

Prerequisites: None

PN 102 Medical Terminology

40 clock hours

This course introduces the student to the basic knowledge and understanding of medical language and terminology used by health care professionals. Students are required to receive a final grade of B or 3.0 or higher in this course or they must repeat the course.

Prerequisites: PN 100

PN 103 Anatomy and Physiology

100 clock hours

This course includes fundamental Anatomy and Physiology of the human body. The student is introduced to selected body systems as well as common diseases related to each. Included are nervous, special senses, integumentary, skeletal and muscular, and respiratory systems. Students are required to receive a final grade of B or 3.0 or higher in this course or they must repeat the course.

Prerequisites: PN 100
PN 104 Human Growth and Development 20 clock hours

This course examines the human life cycle from infancy through old age. Emphasis will be placed on the psychological, biological, and sociological development of the human being and the factors influencing changes that occur during each life stage. The role of the family as it relates to health and wellness and its role in growth and development will also be explored.

Prerequisites: PN 100

PN 105 Vocational Role and Function 15 clock hours

This course will stress the importance of professional and interpersonal communication in order to maintain interdisciplinary relationships. The student is introduced to strong work ethics, personal and professional traits, interpersonal relationship, practicum, and career planning.

Prerequisites PN 100

PN 106 Legal Aspects of Practice 15 clock hours

This course introduces the student to the medical legal issues confronting nurses in the health care settings.

Prerequisites: PN 100

PN 107 Nutrition 15 clock hours

This course will emphasize the importance of promoting good nutrition and the concepts of planning modified diets for the health impaired client. Concepts of nutrition promotion will be explored.

Prerequisites: PN 100

PN 108 Pharmacology & Administration of Medications 80 clock hours

This course introduces the PN student to the basics of Pharmacology. Students will explore the major classes of medications, their therapeutic uses, and nursing interventions related to medication side effects. Students are required to receive a final grade of B or 3.0 or higher in this course or they must repeat the course.
Prerequisites: PN 100

PN 109 Mental Health Nursing 30 clock hours

This course introduces the student to the basic concepts of mental health, mental illness and the role of the practical nurse in caring for clients with mental health needs. The concepts of nursing process, therapeutic communication and legal/ethical/professional standards of care will be explored as they influence mental health nursing practice. Students will develop skills in differentiating among various mental disorders in terms of symptoms, nursing diagnoses, treatment modalities, pharmacology and in the formulation of nursing intervention strategies. Students will have the opportunity to develop skills in assessment and intervention for clients experiencing mood disorders, psychosis and substance abuse.

Prerequisites: PN 100

PN 109CL Mental Health Clinical Nursing 65 clinical clock hours

This clinical practicum emphasizes in the application of the nursing process and knowledge of the mental health population. It also focuses in the application of mental health theory disorders such as eating, mood, personality, substance abuse, and schizophrenia to meet the mental health client needs.

Prerequisites: PN100, PN102, PN103, PN104, PN105, PN106, PN107, PN108, PN112, PN113

PN 110 Community Health Nursing 20 clock hours

This course introduces students to the theoretical concepts of community and population based community health nursing practice. Emphasis will be on promotion of community health and community health nursing roles.

Prerequisites: PN100, PN 102, PN103, PN104, PN105, PN106, PN107, PN108, PN109, PN112, and PN113

PN110CL Community Health Concepts Clinical Nursing 50 clinical clock hours

This clinical course will enable students to apply the community health principles. Clinical experiences focus on principles and concepts of health promotion and health education in
various community setting such as respite homes, homeless outreach centers, and other organizations promoting quality of life for the underserved in the community.

Prerequisites: PN100, PN102, PN103, PN104, PN105, PN106, PN107, PN108, PN109, PN110, PN112, PN113.

PN 111 Geriatric Nursing 30 clock hours

In this course, the student will be introduced to health promotion and care of the older adult. Student will have the opportunity to learn about the health and wellness of the aging population in the United States, explore some of the common myths about aging, and the theories of aging. Next the student will explore methods for assessing body systems, nursing diagnoses appropriate to the older adult, areas in which older adults differ in their response to illness and other stressors, and changes that occur with aging in intelligence, learning and memory. Finally, the student will have the opportunity to learn ways to preserve dignity and self-esteem in the older adult.

Prerequisites: PN100

PN111CL Geriatric nursing (clinical) 144 clinical clock hours

This course provides clinical experience for students with nursing care in geriatric settings working with aging population. The course introduces the students to the practical application of the basic concepts caring for geriatric patients and the role of the practical nurse in their care. This clinical experience builds upon the theory and knowledge gained.

Prerequisites: PN100, PN 102, PN103, PN104, PN105, PN106, PN107, PN108, PN109, PN110, PN111, PN112, and PN113

PN 112 Medical Surgical Nursing 1 75 clock hours

The course is designed to introduce the student to nursing principles in the care of the adult patient. The student will study patient care problems that are specific to altered body systems. The focus will be on the cardiovascular, respiratory, lymphatic and neurological systems. The student will study the essential nursing considerations for total patient care management and the application of the nursing process to formulate nursing care plans.

Prerequisites: PN 100, PN102, PN103, PN104, PN105, PN106, PN107, PN108

PN112CL Medical Surgical Nursing I (clinical) 144 clinical clock hours

This clinical practice emphasizes the life process of adulthood and aging. Integration of nursing science into the problem solving process, interpersonal, and clinical skills in the nursing care of adults, in varying stages of health.

Prerequisite: PN110, PN102, PN103, PN104, PN105, PN106, PN, 107, PN108, PN112
PN 113 Medical Surgical Nursing II 75 clock hours

This course the course is a continuation of Medical Surgical I. Further study will include the urinary, gastrointestinal, cardiovascular, endocrine, reproductive, immune, neurological, and lymphatic systems. The course will also discuss sexually transmitted diseases. The student will study essential nursing considerations for total patient care management and the formulation of nursing care plans.

Prerequisites: PN100, PN 102, PN103, PN104, PN105, PN106, PN107, and PN108, PN112

PN 113CL Surgical Nursing II (clinical) 144 clinical clock hours

This clinical practice is continuation of Medical Surgical I (Clinical). Also emphasizes on the life process of adulthood and aging. Integration of nursing science into the problem solving process, interpersonal, and clinical skills in the nursing care of adults, in varying stages of health.

Prerequisites: PN100, PN 102, PN103, PN104, PN105, PN106, PN107, and PN108, PN112, PN113

PN 114 Obstetric Nursing 35 clock hours

This course introduces the student to the role of the practical nurse in assessing and meeting the needs of the OB/GYN patient. Emphasis will be placed on the roles of the PN in reproductive anatomy and physiology, prenatal development, labor and delivery (including pain management), antepartum and post-partum care, and complications and risk factors of pregnancy. Diseases of the reproductive system will be covered in terms of their deviation from normal functioning.

Prerequisites: PN100, PN 102, PN103, PN104, PN105, PN106, PN107, PN108, PN112, and PN113

PN114CL Obstetric nursing (clinical) 64 clock hours

This course considers the nursing care of individuals on a continuum related to childbearing, evolving through the maternity cycle and care of the neonate. Students apply the basic concepts in caring for childbearing families. Students’ knowledge and understanding of the family and how it is affected during the reproductive experiences is approached in terms of basic health needs--physical, psychosocial, and socio-cultural. Students are exposed to concepts and techniques used in childbirth preparation classes. Throughout the childbearing experience, students will provide nursing care to clients during pregnancy, labor/delivery, and postpartum.
Prerequisites: PN100, PN102, PN103, PN104, PN105, PN106, PN107, PN108, PN112, PN113, PN114.

**PN 115 Pediatric Nursing**  
35 clock hours  
This course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship to the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.  
Prerequisites: PN100, PN 102, PN103, PN104, PN105, PN106, PN107, PN108, PN112, and PN113, PN114

**PN115CL Pediatric Clinical Nursing**  
64 clinical clock hour  
This course focuses on health management and maintenance and the prevention of illness, care of the family as a whole, care of the child as a whole, and deviations from the normal state of health. The definition of client care includes using the nursing process, performing assessments, using critical thinking, and providing client education. Topics include: health management and maintenance and prevention of illness, care of the child as a whole, and deviations from the normal state of health in the pediatric client; care, treatment, pharmacology, medication administration, and diet therapy of the pediatric client; growth and development; and standard precautions.  
Prerequisites: PN100, PN102, PN103, PN104, PN105, PN106, PN107, PN108, PN112, PN113, PN114, PN115.

**Phlebotomy Technician**
220 Clock Hours  
Diploma Program  
11 Weeks  
Method of Delivery: Residential

PROGRAM DESCRIPTION/ PROGRAM OBJECTIVE
The program objective is to provide students with career training for employment as basic Phlebotomists in a physician’s office, hospital, outpatient center, laboratory, or other healthcare facility. Students will practice Phlebotomy procedures on a training arm. The national Phlebotomy Technician certification examination through NCCT may be taken (not required by the state) when the applicable number of venipuncture’s and capillary sticks have been obtained and documented by an employer.

HC101 Heath Core and Body Systems 100 clock hours
This course describes health care delivery system and health occupations communication interpersonal skills, computer literacy, infection control and recognition and response to emergency situations. This course also includes safety and security, ethical and legal issues, employability skills, basic math and science, and wellness and disease concept, HIV/AIDS, Domestic Violence and OSHA are also included.
Prerequisites: None

PH101 Phlebotomy 120 clock hours
This course includes an introduction to phlebotomy, equipment, safety, and specimen collection techniques. The student receives instruction in anatomy, infection control, special procedures and documenting competency skills.
Prerequisites: None

Ophthalmic Technician

Diploma
900 clock hours
37.5 Instructional Weeks
Residential

PROGRAM DESCRIPTION/PROGRAM OBJECTIVE

The Ophthalmic Technician program at Cambridge College of Healthcare & Technology is designed to provide training and education in order to prepare graduates to plan, deliver,
and manage patient care as an ophthalmic technician. The program offers students the opportunity to learn to effectively function as an integral part of the interdisciplinary team in a healthcare delivery system. At the completion of the program, graduates who have attended class and their clinical externship, studied, and practiced their skills should have the ability to seek entry-level employment as ophthalmic technician.

The requirements of the Program for graduation are as follows:

Completion of all program courses with a satisfactory grade of 75% or above in theory and a passing grade in all clinical courses. Completion with an earned grade point average of 2.5 or above. Tuition accounts satisfied

Course Descriptions

Ocular Anatomy & Physiology – OPT 100  

60 clock hours

Instruction on Anatomy of the visual sensory organs and related structure. Gross, as well as microscopic structures will be examined, as well as identification of major structures. The mechanisms of action, or physiology of the structures will also be explored within the course.

Prerequisites: None
Ocular Pathology & Microbiology OPT - 105 60 clock hours

Instruction of the pathology and microbiology as it relates to the visual sensory organs. Students will learn to identify the various pathogens and microbes that affect the eyes.

Prerequisites: None

Medical Terminology OPT - 110 60 clock hours

This course provides instruction in how to decipher useful medical terminology into everyday language. Students analyze and learn prefixes and suffixes, spelling use and correct pronunciation. Medical abbreviations and symbols are included.

Prerequisites: None

Introduction to Health Science OPT - 115 60 clock hours

Students will examine the following topics: The healthcare professions and teams, interactions between and reactions of patients in altered physical &/or mental states including gerontology and diverse cultures, professionalism and professional organizations, vital signs, OSHA standards, asepsis and isolation techniques including universal precautions, ethics and legal concerns of the healthcare provider, lifting/moving/body mechanics, patient and environmental emergency assessment and response, and Basic Cardiac Life Support (BCLS). The student will possess the aptitude to comprehend and use information in both written and oral formats.

Prerequisites: None

Administrative Procedures & Protocol – OPT 120 120 clock hours

This course introduces the student to administrative procedures for contributing to a successful functioning physician’s/clinic office.

Prerequisites: None

Clinical Procedures & Protocol – OPT 125 240 clock hours

This course introduces the student to the various clinical procedures that would take place in a clinical/surgical setting.

Prerequisites: OPT100 & OPT105
Ocular Imaging & Pharmacology – OPT 130

This course covers the fundamentals of ophthalmic photography, ultrasonic techniques, and light based imaging.

Prerequisites: OPT100 & OPT105

---

**Distant Education**

Cambridge College of Healthcare & Technology strives to provide students with the ability to adapt their skills and knowledge to meet the demands of a dynamic, team-based environment. The online Distance Education Division focuses heavily on concept formation and skill development through collaborative learning. Our online courses offer flexibility to students.

The following courses may be offered on campus, on-line or a combination of both:

- Anatomy & Physiology I
- Anatomy & Physiology II
- College Algebra
- English Composition
- Medical Terminology
- Introduction to Psychology
- Introduction to Health Sciences
- Fundamentals of Speech
- Introduction to Computers
- General Physics

*Registered Nurse to Bachelor of Science in Nursing (RN to BSN)*

Bachelor of Science Degree Program
Method of Delivery – 100% Distant Education
64 weeks- hours may vary
125 semester hours
(77 semesters credits awarded for prior learning and admission requirements*)
720 clock hours

*Medical Billing and Coding
900 Clock Hours
Diploma Program
37.5 Weeks
Method of Delivery: 100% Distant Education

*These programs are offered out of our Altamonte Springs, Florida campus through the Blackboard Platform.

Course Delivery Structure
Cambridge College of Healthcare & Technology is pleased to offer a user friendly learning platform. Our courses offer diverse learning methodologies that enable students of all backgrounds to enjoy their experience online. Students are able to interact with instructors and peers in diverse learning experiences that facilitate the acquisition and application of knowledge. Our courses are offered in an asynchronous format but there are synchronous discussions for which students must be prepared to participate.

Security
Students are assigned a secure username and password for Blackboard.

Student Support Resources
Each Cambridge College of Healthcare & Technology course contains access to the following supportive resources:

Syllabus
Each course syllabus includes the course description, course outcomes, course materials list, general course policies, the grading scale, instructor contact information and other pertinent course level information.

Discussion Boards
Discussions are tied to specific course Learning Events for each course.
**Integrated Content**

Some Distance Education courses include integrated electronic content from a text companion web site, CD-ROM or other delivery device. This content is fully integrated into the related course of instruction or Learning Event with instructions for its use and purpose.

**Online Course Survey**

Students are given an opportunity to provide feedback on the courses taken online. These surveys are designed to assess the online content, learning management system, ease of access, student services and faculty. Students are encouraged to complete online surveys at the completion of a course.

**Web Resources**

Every course includes links to additional web resources that serve as supplemental resources for the subject matter. These links are provided by the instructor and are not tied to a specific Presentation or Learning Event, but are identified as extra resources for the student’s own use.

**Technology Requirements**

If your computer does not have the proper hardware, Blackboard Learn Release 9.1 may run slowly or may not run at all. Prior to using Blackboard Learn Release 9.1 on your computer, compare your current system configuration with the system requirements below.

Microsoft Windows PC Requirements

**Hardware**

- **Operating System:**
  - Windows XP (SP2 or SP3), or newer *(minimum requirement)*

- **Processor Speed:**
  - 800 MHz Pentium III, or equivalent/better *(minimum requirement)*

- **CPU Memory:**
  - 512 MB of RAM or more *(minimum requirement)*

- **Internet Connection:**
  - Cable Broadband or DSL *(minimum requirement)*

- **Internet Browser:**
  - Internet Explorer 8.0 or greater; Mozilla Firefox 8 or greater, Google Chrome 14.0 or greater *(minimum requirement)*

  - Internet Browser Configuration:
    - Pop-Up Blocking disabled
    - JavaScript Enabled
    - Adobe Flash Player 10 or higher (free download)

- **Java Runtime Environment:**
  - Version 6 (build 1.6.0) or higher (free download)

- **Hard Disk Space:**
Hardware requirements:

- Operating System:
  - OS 10.4 (minimum requirement)
- Processor Speed:
  - 800 MHz G4, or better (minimum requirement)
- CPU Memory:
  - 256 MB of RAM or more (minimum requirement)
- Internet Connection:
  - Cable Broadband or DSL (minimum requirement)
- Internet Browser:
  - Apple Safari 5.1 or greater, Mozilla Firefox 8 or greater, Google Chrome 14.0 or greater (minimum requirement)
- Internet Browser Configuration:
  - Pop-Up Blocking disabled
  - JavaScript Enabled
  - Adobe Flash Player 10 or higher (free download)
- Java Runtime Environment:
  - Version 6 (build 1.6.0) or higher (free download)
- Hard Disk Space:
  - 500 MB Free (minimum requirement)
- Audio Card:
  - 24-bit or better (minimum requirement)
- Headset or speakers
- Computer microphone

Software:

- Microsoft Office Suite 2007 or higher (Word, Excel, PowerPoint) (minimum requirement)
- Windows Media Player 12 or newer (free download)
- Adobe Acrobat Reader 10 or newer (free download)
- An updated anti-virus software

Macintosh Requirements

Hardware (minimum requirements)

- Operating System:
  - OS 10.4 (minimum requirement)
- Processor Speed:
  - 800 MHz G4, or better (minimum requirement)
- CPU Memory:
  - 256 MB of RAM or more (minimum requirement)
- Internet Connection:
  - Cable Broadband or DSL (minimum requirement)
- Internet Browser:
  - Apple Safari 5.1 or greater, Mozilla Firefox 8 or greater, Google Chrome 14.0 or greater (minimum requirement)
- Internet Browser Configuration:
  - Pop-Up Blocking disabled
  - JavaScript Enabled
  - Adobe Flash Player 10 or higher (free download)
- Java Runtime Environment:
  - Version 6 (build 1.6.0) or higher (free download)
- Hard Disk Space:
  - 500 MB Free (minimum requirement)
- Audio Card:
  - 24-bit or better (minimum requirement)
- Headset or speakers
- Computer microphone

Software:

- Microsoft Office for Mac 2008 Suite (Word, Excel, PowerPoint) (minimum requirement)
- Adobe Acrobat Reader 10 or newer (minimum requirement)
- Updated anti-virus software
Microsoft Word is required to submit all assignments. In addition, some classes require the use of Excel, PowerPoint, and Access. Students are responsible for ensuring that they have the software required and should not enroll in courses for which they do not have the necessary software.

**Internet/Email**
- An internet service provider (ISP)
- An e-mail address, once enrolled you will be given a Cambridge email.

Students will need an Internet Service Provider (ISP). An ISP supplies access to the Internet for a fee. In many areas, cable television and digital Internet services offer high-speed Internet access. The Cambridge Institute of Allied Health does not provide access to the Internet as part of its agreement.

**LIBRARY/VIRTUAL LIBRARY**
The campus has a fully functioning library that is open each day. The mission of the library is to provide academic support to students and to create a stimulating environment that will encourage academic achievement. Students have access to a collection of books and electronic resources available for use in the building or remotely.

The link to the Virtual Library is found in our online learning management system. Students have access to research the library when logged into the online learning management system.

The Virtual Library contains full-text articles from thousands of major newspapers, trade journals, academic periodicals, magazines and international publications. Discipline-related databases furnish valuable industry information useful for course-related projects and job search opportunities as related to each program major. The library is an online learning resource center that is a web-enabled information center offering Microsoft Word, Excel and Power Point 2007, 2010, committed to facilitating lifelong learning and achievement of Cambridge College of Healthcare & Technology student and faculty community.

**CAREER SERVICES**
It is the policy of Cambridge College of Healthcare & Technology to provide job search assistance to all graduates in the field for which they are trained. Although Cambridge College of Healthcare & Technology provides employment assistance, it cannot guarantee employment upon graduation.

Recognizing that career development is an ongoing process, the Career Services team strives to help students understand the importance of self-assessment, occupational exploration, decision making, goal setting, networking, the job search, and developing productive connections in the workplace. Career Services offers a collaborative link between students, faculty, and prospective employers within the global employment community. Career Services fosters a welcoming, accessible environment where diversity is celebrated and the uniqueness of each individual is valued and respected.
The Career Services staff will assist students in their job searches. Many students choose to work on a part-time basis during their training to help with their education costs. Additional services include assistance with job search planning, resume and cover letter review, interview preparation, decision making, job offer negotiations, and various other job search and career-related issues.

**STUDENT SERVICES**

**Orientation of New Students**
Orientation is conducted prior to the beginning of each program. Members of the administration and education department familiarize students with Cambridge’s academic policies and procedures. Participation in orientation is mandatory.

**Academic Advising**
Cambridge College of Healthcare & Technology provides individual assistance and advisement to students with academic problems in particular subjects. Students are encouraged to schedule an appointment with their instructors to work on any specific problem they may be having in their program. All academic advisement is provided by instructors and program staff.

The staff and faculty on each campus are available to assist students in academic and career guidance. The Program Team is available to answer questions concerning the student’s individual major, provides academic advising and may also provide referral services to external agencies as necessary.

**RESOURCE CENTER**
Cambridge College of Healthcare & Technology Resource Center provides current reference materials, journals, computers with internet access and virtual resources, as well as other supplemental learning resources for student use. A librarian is available on campus during specific Resource Center hours.

**TUTORING**
Instructors are available by appointment to students who feel they need additional assistance outside normal class hours. Tutoring assistance is available at no charge and we urge those who desire this service to take advantage of this assistance.

Students who experience difficulty in their coursework and have a need for academic support should first contact their Instructor to determine an academic success plan. If further support is required, the instructor or the student should notify the Program Director to arrange for tutoring.
INDIVIDUALS WITH DISABILITIES
Reasonable Accommodations Policy – Individuals with Disabilities
Cambridge College of Healthcare & Technology does not discriminate against individuals on the basis of physical or mental disability and is fully committed to providing reasonable accommodations, including appropriate auxiliary aids and services and academic adjustments, to qualified individuals with disabilities, unless providing such accommodations would result in an undue burden or fundamentally alter the nature of the relevant program, benefit, or service provided by Cambridge College of Healthcare & Technology.

To request an auxiliary aid or service or academic adjustment please contact the Campus ADA/504 Coordinator, at the campus. Applicants for admission or current students requesting an auxiliary aid or service or academic adjustment will need to complete an Application for Auxiliary Aid. The Application and information about the accommodation process is available from the Campus ADA/504 Coordinator. To enable Cambridge College of Healthcare & Technology to evaluate the student’s needs and provide appropriate reasonable accommodations in a timely fashion, Cambridge College of Healthcare & Technology requests that applicants or students to complete and submit all required forms and documentation at least four (4) weeks before the first day of classes, or as soon as practicable. No applicant or student shall be prohibited from receiving auxiliary aids or services for failure to submit the required forms and documentation within the above requested timeframe. Disagreements regarding an appropriate auxiliary aid and alleged violations of this policy may be raised pursuant to Cambridge College of Healthcare & Technology’s Grievance Procedures.

STUDENT RIGHTS AND RESPONSIBILITIES

All students have the right to know:
• The School's accrediting and licensing agencies
• The School's programs, facilities and faculty
• Curriculum Content
• The right to receive an Institutional Catalog
• The Program’s accrediting agencies
• The cost of attending Cambridge Institute
• The financial assistance available
• How to submit appeals under various school policies
• The School's method of determining satisfactory academic progress and how it affects the student's financial aid eligibility

All students have the following responsibilities:
• To maintain professional behavior and conduct at all times
• To review and consider all aspects of the School programs before enrolling
• To provide additional documentation, verification, correction, etc. as requested by the School or agency
• To read, understand and keep copies of all forms received
• To notify the School of a name or address change
• To understand the School's Institutional Policies

Retake Course Policy and Fees:

• Each Course failed will have a $50 Retake Fee assessed to the student’s ledger card
• If a failed course is not offered to retake in the next semester the student will be dropped and re-entered at the appropriate time to retake the course
• Retake fee is assessed when the student is scheduled and starts repeating the failed course
• For the semester credit programs the repeat course can be counted in the credits attempted in the semester for one repeat only (i.e…. the student has two attempts to pass a course)

• For clock hour programs the hours in the repeated course can only be counted for one repeat (i.e…. the student has two attempts to pass a course)

Payment Policy
Tuition and fees are due at the start of the program. The College reserves the right to remove any student from class that has not satisfied his or her financial obligations. Students are welcome to make payments on tuition and fee charges using checks, money orders, or credit cards. Cambridge offers institutional payment plans to students during their enrollment.

School Uniform
Most programs include the cost of one uniform. Additional uniforms may be purchased at the Bursar’s office for $30. Students are required to wear closed-toe shoes.

Period of Obligation
The length of the program shall determine the period of financial obligation for all courses. An application fee of $50.00 is due on the day of enrollment. A predetermined initial payment is due on the first day of class in some programs. A student must pay his/her tuition payment according to an agreed upon financial schedule. A student that does not meet his/her financial schedule obligation may be withheld from attending class until all financial payments are current. Cambridge Institute reserves the right to change tuition and fees without notice. Students who are actively attending class will not be
affected by any tuition changes. Cambridge Institute will withhold a student’s diploma and official transcript until all academic and financial obligations are met. A student that fails or withdraws from his/her class, if re-instated, will be charged tuition and fees as stated in the current catalog. A student that drops from his/her class or is terminated from the school is obligated to pay for tuition and fees according to the refund policy.

STANDARDS OF SATISFACTORY ACADEMIC PROGRESS (SAP)

According to federal regulations, students participating in the federal financial aid program at Cambridge College must meet our Standards of Satisfactory Academic Progress (SAP). The SAP calculation uses cumulative credit/hour totals.

Definition and Purpose of Satisfactory Academic Progress (SAP)

Satisfactory Academic Progress (SAP) is measured in both qualitative and quantitative components. SAP is defined as a method of determining student eligibility for assistance under a Title IV, HEA program, and applies reasonable standards for measuring whether an otherwise eligible student is maintaining satisfactory progress in his or her educational program.
There are three standards that are used to measure academic progress for financial aid purposes:

Standard 1-Qualitative: Cumulative grade point average (GPA) is at or above 2.0 for all students with the exception of Nursing, which requires a cumulative grade point average (GPA) at or above 2.8.

Standard 2-Quantitative (Pace of Progression): Cumulative completion rate is at or above 67%. Students must successfully complete at least 67% of their cumulative attempted credit/clock hours to stay on pace with the Maximum Time Frame requirements. Anytime a student withdraws, fails, and/or repeats a class, it is counted as attempted but not completed for this measurement. For example, if a student has attempted 24 cumulative credit hours, but only completed 12 cumulative credit hours, this equates to a 50% completion rate.

Standard 3-Maximum Timeframe: Credits/clock hours completed and/or attempted does not exceed 150% of the credits/clock hours required to complete the program. Financial aid recipients are required to complete their program within 150% of the published length of the program as measured by the cumulative number of credit/clock hours the student is required to complete and expressed in calendar time. (Note that a student in a clock hour program cannot receive aid for hours beyond those in the program; the maximum timeframe applies to the amount of calendar time the student takes to complete those hours.) Students become ineligible for Title IV aid in the current program of study when it becomes mathematically impossible to complete the program within 150 percent of the length of the program, even when the student has not yet reached 150 percent.

**Course incompletes (I), Withdrawals (W/WF) and Repetitions**
Grades including Incomplete (I), Fail (F), and Withdrawn (W/WF) are defined as unsuccessful completion. Accordingly, these courses count as the applicable credits/hours attempted and count as zero credits/hours earned in the SAP calculation. The grade of “F” additionally counts as zero quality points when the qualitative SAP standard is assessed. Grades of I and W/WF are not counted when the qualitative SAP standard is assessed. Grades of I and W/WF do not carry any quality points. Students who have a grade of incomplete that results in an unsatisfactory standing, may have their SAP status recalculated when they subsequently complete the course requirements those grades are later reported. Students who achieve satisfactory standing as the result of a grade recalculation will be evaluated for reinstatement of financial aid so long as all other eligibility criteria are met. The grade earned in a repeated course will be substituted for the original grade, if higher, in computing the grade point average for SAP.

**Transfer Credits**
Transfer credits that count toward the student’s current program are counted as both attempted and completed hours in the quantitative measures.

**The SAP Review**
A review of SAP requires that both the qualitative and quantitative measures be reviewed.
• We will count all credits/clock hours that appear on a student’s transcript as cumulative hours attempted and/or completed.
• If a student is enrolled in a credit granting program, we will calculate all standards at the end of each term.
• If a student is enrolled in a clock hour program, we will calculate all standards at the time he/she successfully completes the required hours in a payment period.

Notification
Students are notified via email when they have not met SAP requirements. The student is then required to meet with the Registrar and Program Official to discuss requirements for meeting SAP.

SAP Violations
If a satisfactory progress check shows that a student does not have the required GPA or is not maintaining the required pace, the following actions will occur:
• First violation: Student to be placed on SAP Warning status until the next check. During this time, the student will be eligible for aid. If the student is meeting SAP standards at the next checkpoint, the student will return to good standing.
• Second consecutive violation: At this time, the student will be placed on SAP Termination and will not be eligible for aid unless they successfully appeal. If appeal is successful, student will be placed on SAP Probation status until the next checkpoint.

SAP Termination- Students whose eligibility has been terminated (because of failure to meet the standards of satisfactory progress) that do not appeal, will not be eligible to receive aid, but may maintain enrollment. Student will be required to pay for their own classes until they have earned the minimum required GPA and/or completion rate. Students will not be reimbursed for courses taken while ineligible for aid. Eligibility will be regained once a student is found to be meeting both the Quantitative and Qualitative SAP standards, but while not exceeding the Maximum Time Frame.
Students whose eligibility has been terminated (because of failure to meet the standards of satisfactory progress) may, in certain cases, appeal their suspension of eligibility. Circumstances that may be considered for this special review (appeal) include: illness of student and/or immediate family member (mother, father, sister, brother, spouse), death of immediate family member and relocation due to military duty or employment. If there are extenuating circumstances that caused the student to fail SAP, the student may file an appeal. A student whose appeal is approved will have financial aid eligibility reinstated on a Probationary basis for one payment period. The student may continue to receive financial aid during this Probationary Period but must meet the regular SAP standards or be making progress under an approved improvement plan by the end of the Probationary Period. By the end of that term/payment period, your academic credentials must meet SAP standards. Appeals are not retroactive.

Procedure for SAP Appeal
Appeals are to be submitted to the Registrar’s office. The Registrar will provide the appeal to the Academic Affairs Committee for a final decision. In order to appeal the decision on this basis; the following procedures must be used:
1. Complete SAP Appeals Form.
2. Type an appeal letter, or print legibly. Make sure to include a detailed explanation of the circumstances that occurred.
3. Provide documentation from a third party to support the appeal.
4. Be sure that the circumstances referenced apply to the term/payment period for which the student is claiming mitigating circumstances.
5. Once your appeal has been reviewed the student will be notified of the result by email.

**Change of Program:**
Satisfactory Academic Progress starts over when a student enrolls in a new program.

**Grade Quality Points**

P – Pass; Satisfactory completion of course work where no letter grade is given. It is equivalent to a grade of C or higher and carries no quality points.

IP – In Progress; required work in the course is in progress. The method and time for completion of the work must be agreed upon, in writing, by student and instructor. IP work not completed by the end of the agreed upon time period will automatically change to a grade of F. If a student does not complete the requirements by the scheduled end date of the course, the student may receive a grade of In Progress (IP).

**LEAVE OF ABSENCE**

In the event of an emergency, Cambridge College of Healthcare & Technology may grant a leave of absence. However, when students are not in regular attendance, they jeopardize the quality of their education. Therefore, a leave of absence is discouraged.

A leave of absence must be requested in writing on an official Leave of Absence Form obtainable from the administrative office of Cambridge College of Healthcare & Technology prior to the beginning of the proposed requested leave. A leave of absence must be approved by the Program Director and/or the Campus Director and may not exceed 180 days or the start of the next available class at the current location, whichever event shall first occur.

**FINANCIAL ASSISTANCE**
Financial Aid
Cambridge College of Healthcare & Technology believes that students and their families have the primary responsibility for educational costs. However, we realize that many families are unable to immediately fund the entire cost of education. To that end, Cambridge College of Healthcare & Technology participates in Federal Title IV financial assistance programs to aid students who qualify in meeting the cost of attending school. Many Cambridge students supplement Title IV aid with other financial assistance programs such as employer reimbursement, veteran benefits, agency sponsorship, and other educational financing sources. A student can enlist the help of the financial aid department if assistance is needed to obtain supplemental aid. Cambridge College participates in the Federal Financial Aid (Title IV) Program which is available for those students who qualify.

Some of the frequently used financial aid programs are listed here and described below:
• Pell Grants
• FSEOG
• Federal Work Study
• Direct Subsidized Stafford Loans
• Direct Unsubsidized Stafford Loans
• Direct PLUS loans for parents of qualified dependent students
• Florida Student Assistance Grant (FSAG)
• Florida Bright Futures Grant
• Workforce Investment Act (WIA)
• 529 Prepaid College Plans
• Veteran Benefits
• Scholarships

Financial Aid Eligibility Requirements
A complete list of student eligibility standards and conditions may be found in The Student Guide, as published by the following U.S. Department of Education Financial Aid website at www.studentaid.ed.gov.

Application to Receive Financial Aid
All students must apply for financial assistance by completing a Free Application for Federal Student Aid (FAFSA) at FAFSA.ed.gov and by submitting appropriate documentation to the institution and financial aid department.

The Financial Aid Department maintains adequate records to ensure proper administration of aid funds through use of the Campus Management software system. This includes ensuring that aid given is not in excess of need and or the cost of attendance, annual and aggregate limits, limited to enrollment status and satisfactory academic progress.

When a student completes the FAFSA and submits any required documents, the Financial Aid Officer will send the student an estimated award letter.
Selection of students to receive financial aid will be made without regard to age, sex, race, color, religion, sexual orientation, national origin, disability or marital status.

**Participation Requirements for the Federal Direct Loan Program**

In order to participate in the Direct Loan or Direct PLUS Loan programs students must:

- Complete a Free Application for Federal Student Aid (FAFSA)
- Sign award letter
- Submit a Master Promissory Note (MPN)
- Complete Entrance Counseling at studentloans.gov
- For PLUS Loans, the parent borrower must complete application, credit check, and MPN at www.studentloans.gov.

**Veteran Scholarship Program**

Cambridge offers a College Scholarship which is available for veterans accepted to Cambridge College. This scholarship award is granted in the amount of $3,500 towards tuition in all programs. This scholarship may be used in conjunction with other funding sources. The Cambridge College Veteran Scholarship Program is not a cash scholarship directed to students, but a scholarship that pays down the cost of tuition for those who apply and are awarded this scholarship. There are a limited number of scholarships available annually. Determination of award is based on a first come first served basis, contingent upon proving Veterans status and acceptance to Cambridge College.

**Attendance Policy for Veterans**

Excused absences will be granted for extenuating circumstances only. Excused absences will be substantiated by entries in student files. Early departures, class cut, tardiness, etc., for any portion of an hour will be counted as one clock-hour of absence. Students exceeding three days unexcused absences in a calendar month will be terminated from their VA benefits for unsatisfactory attendance. Regardless, all excused absences MUST be made up within the course period. Students with absences will be given a final grade of “I” (Incomplete) and granted up to two weeks after the end of a course to make up hours missed for the course. If the student has not met this requirement within the specified time frame the faculty in conjunction with the Registrar’s office will rescind the “I” and award a final grade of “F” for the course.

**Veterans Attendance Record Maintenance**

The student’s attendance record will be retained in the veteran’s file for USDVA and SAA audit purposes.

**Mandatory Entrance and Exit Loan Counseling**

All Borrowers are must participate in Entrance Counseling at www.studentloans.gov. All first time borrowers must complete an entrance counseling session on the Department of Education web site before any loan funds can be disbursed. All students nearing program completion, leave the Institution, or drop below half time and who have borrowed (an) educational loan(s) are required to complete the exit loan counseling session on the Department of Education’s web site www.nslds.ed.gov.
Financial Aid Verification
The federal government has established an application review process called, Verification, to ensure that all data provided on the Federal Application for student Aid (FAFSA) is correct and complete. All students are encouraged to use the IRS Data Retrieval Tool when originally completing the FAFSA. Students who fail to link with the IRS Data Retrieval Tool will be asked to return to the FAFSA.ed.gov website and link. If the student is unable to link to the IRS, the student is required to submit an IRS Tax Transcript as mandated by the Department of Education. Applicants must comply with the requests for documentation within specified times or applicants may lose financial aid eligibility.

Cost of Attendance
A school's cost of attendance figures can help in financial planning for your education by providing an estimate of what it costs to attend a specific school for a year. When awarding financial aid, schools must take this cost of attendance into account. Federal, state and institutional aid awarded to a student cannot exceed a school's cost of attendance. The official cost of attendance includes:

- Tuition and Fees
- Books and Supplies
- Room and Board
- Transportation
- Miscellaneous Expenses

Federal Direct Loans
Federal Direct loans, available through the Federal Direct Loan Program, are low- interest loans that are made to the student by a lender, such as a bank, credit union, or savings and loan association. The loan must be used to pay for direct and/or indirect educational expenses. Subsidized loans are based on financial need while unsubsidized loans are not. Repayment begins six months after the student graduates, withdraws from school, or falls below half-time enrollment status.

Federal Direct Parent Loan for Undergraduate Students (PLUS)
The Federal Direct PLUS loan, another Direct loan program, is available to parents of dependent undergraduate students. These loans are not based on financial need but when

![Table of Loan Limits](image.png)
combined with other resources, cannot exceed the student’s cost of attendance. A credit check is required and either or both parents may borrow through this program. Repayment begins within 60 days of final disbursement of the loan within a loan period.

**Florida Bright Futures**

The Florida Bright Futures Scholarship Program establishes three lottery-funded scholarships to reward Florida high school graduates for high academic achievement. The Florida Bright Futures Scholarship Program is comprised of the following three awards:

*Florida Academic Scholars (FAS) award (including Academic Top Scholars (ATS) award
*Florida Medallion Scholars (FMS) award
*Florida Gold Seal Vocational Scholars (GSV) award

**WITHDRAWAL**

Withdrawal Policy
Official Withdrawal: A student who wishes to officially withdraw must notify the office of the Registrar via email, certified mail or in person.

Unofficial Withdrawal:
Credit Hour Programs: If a student misses eight (8) consecutive scheduled classes, the student will be automatically terminated without the opportunity to appeal.

Clock Hour Programs: If a student misses five (5) consecutive scheduled classes, the student will be automatically terminated without the opportunity to appeal.

Students attending only online classes: If a student does not submit any coursework for 14 consecutive calendar days, the student will be automatically terminated without the opportunity to appeal.

**Policies for Withdrawal**

A student who wishes to withdraw from a program must follow the withdrawal procedures described below:

A student who wishes to officially withdraw from Cambridge College of Healthcare & Technology must notify the office of the Registrar via email, certified mail or in person. Students who wish to withdraw must complete the appropriate paperwork.

If a student in a credit hour program misses eight (8) consecutive days or a student in a clock hour program misses five (5) consecutive class days, the student will be automatically terminated from Cambridge College without any entitlement to appeal such termination to the Academic Affairs Committee.

**Official withdrawal from the course, no credit earned.**

If a student's last date of attendance is at or less than the 20% point of attendance of a
course, they will receive a grade of W. If a student's last date of attendance is after the 20% but before the 60% point of attendance of course, they will receive a grade of WF. If a student’s last date of attendance is at or above the 60% point of attendance, they will receive a grade of an F.

The add/drop period for a course that is 16 weeks in length is two weeks from the start of the course. The add/drop period for a course that is less than 16 weeks in length is one week from the start of the course.

**Determined Date of Withdrawal**

The determined date of withdrawal date used to determine when the student is no longer enrolled at Cambridge College of Healthcare & Technology is:

- The date the student began the official withdrawal process, either by submitting an official withdrawal form to School Director or by verbally communicating the student’s intent to School Director, and has ceased to attend classes. A student who submits a completed official withdrawal form or verbally communicates his/her intent but who continues to attend classes or other school activities will not be considered to have officially withdrawn from school.

- If a student does not complete the official withdrawal process, the School will determine the student’s withdrawal date based upon Federal regulations and institutional records.

For Federal student loan reporting purposes, the student’s last date of attendance will be reported as the effective date of withdrawal for both official withdrawals and those who do not complete the official withdrawal process.

Please note that the above policy may result in a reduction in school charges that is less than the amount of Title IV financial aid that must be returned. Therefore, the student may have an outstanding balance due the School that is greater than that which was owed prior to withdrawal. Accordingly, Students who are considering withdrawal from school are strongly advised to see a financial aid advisor to become familiar with the financial consequences of withdrawal.

**Last Day of Attendance**

The last day of attendance for refund computation purposes is the last date of activity or attendance by a student in a class. The determined date of withdrawal is the date the School made a determination that a student had withdrawn. Any remaining credit balance due to a student will be refunded within 14 days of the date the withdrawal is processed. If a student is less than 18 years of age, notice of withdrawal may be given only by the purchaser, parent or guardian.

**Financial Aid –Returning Title IV Funds after a Student is Dropped or Withdrawn**

The law specifies how to determine the amount of Title IV assistance earned at the time you withdraw or are dropped from a program. Title IV programs include Grants and
Direct Loans. Cambridge Institute will calculate the amount of Title IV aid that you have earned based on the period of enrollment using a specific formula. The student will be obligated for any tuition or fees not covered by Title IV funds.

Any required return of Title IV funds will be made within 45 days after the determined date of withdrawal,

**REFUND POLICY for CREDIT GRANTING PROGRAMS**

The amount of assistance earned is credited to your student account and is determined on a pro rata basis. For example, if you complete 30% of the semester, you earn 30% of the assistance you were originally scheduled to receive. Once you have completed more than 60% of the semester, you earn all assistance you were scheduled to receive for that period.

Cambridge College must return the unearned aid for which the school is responsible by repaying funds to the following sources, in order, up to the net amount disbursed from each source: Unsubsidized Direct Loans, Subsidized Direct Loans and Pell Grants. Loan amounts are returned in accordance with the terms of the promissory note.

Once the amount of Title IV financial aid that was not earned has been calculated, Federal regulations require that the school return Title IV funds disbursed for the payment period or period of enrollment and used for institutional costs in the following order:

- Unsubsidized Direct Stafford Loans (other than PLUS loans)
- Subsidized Direct Stafford Loans
- Federal PLUS Loans
- Direct PLUS Loans
- Federal Pell Grants
- Federal SEOG
- Federal Work Study

If the amount of unearned Title IV financial aid disbursed exceeds the amount that is returned by the School, then the student (or parent, if a Federal PLUS Loan) must return or repay, as appropriate, the remaining grant and loan funds. The student (or parent, if a Federal PLUS Loan) will be notified of the amount that must be returned or repaid, as appropriate.

**TUITION REFUND POLICY for CLOCK HOUR / CREDIT HOUR PROGRAMS**

**For Credit:**

Students withdrawing from the Institute must comply with the policies and procedures as defined in the catalog. Students will be responsible for all tuition & fees for each semester they are presently attending in addition to any prior account balance. Cambridge College charges students tuition and fees by semester. All uniforms and other miscellaneous items that are not included in tuition are non-refundable. A detailed schedule of fees and charges associated with the programs offered are included in the catalog. Tuition retained is
calculated as shown below:

- Withdrawing at any time during the first week of the semester- 100% refund of tuition only.
- Withdrawing at any time after the first week but within the first 3 weeks of the semester- 85% refund of tuition only
- Withdrawing at any time after the first 3 weeks but within the first quarter of the semester- 75% refund of tuition only.
- Withdrawing at any time during the second quarter of the semester- 50% refund of tuition only.
- Withdrawing at any time during the third quarter of the semester- 10% refund of tuition only.
- Withdrawing at any time during the last quarter of the semester- no refund of tuition.

For Clock:
This policy applies to students that voluntarily withdraw or have been terminated by the college from his/her program. The official withdrawal date is the last date of attendance or the date of determination that the student has withdrawn from the program. The formula for the college’s pro-rata tuition refund policy is based upon the length of time a student remains enrolled in a program. Refunds will not be granted for books, supplies, materials or kits. No tuition refund is due after 60% of the program is completed. If a credit balance appears on the student’s account as a result of the refund, this credit balance will be issued to the student within 14 days.

CANCELLATION POLICY FOR ALL PROGRAMS

• Cancellation must be made in writing within 3 business days of signing the enrollment agreement. In this case, all monies will be refunded and the application fee will be retained.

• If a student is not accepted to the school or does not meet admissions requirements, the student’s enrollment will be cancelled and the application fee will be retained.

• If a student is unable to meet their tuition obligation prior to beginning the program, the student’s enrollment will be cancelled and the application fee will be retained.

Terms and Conditions for Federal Loan Deferments
A Deferment is a temporary suspension of payments on a student loan. Deferments are entitlements. As long as a student is eligible for a Deferment, and provides the necessary documentation, their lender is required to grant one. If a student is granted a Deferment the Federal Government will pay all interest on any subsidized loan. However, the student is responsible for any interest that accrues on an unsubsidized loan, and should they decide not to pay the interest while they are in a Deferment that interest will be capitalized. Deferments can be granted for students that are in-school, unemployed, experiencing economic hardship, or active duty in the military.
For more information or to obtain a Deferment form you can go to your Financial Aid office, or contact FA Help department at 1-888-730-6924 and FAHelp@edaff.com. When a new student enrolls at our school, with loans from a school prior to ours, the Financial Aid office will assist the student in applying for an In-School Deferment. This deferment will postpone any federal financial aid loan payments while the student is enrolled at our school at least half-time. Once the form is completed by both the student and the school’s Registrar, the Financial Aid office will forward the form to all the student’s previous lenders and follow up with them to ensure it was received and processed.

For more information on Cambridge Institute and its campuses and programs please visit our website at www.cambridgehealth.edu.
RULES AND REGULATIONS

SEXUAL HARASSMENT
It is the policy of Cambridge College of Healthcare & Technology that conduct by any of its employees or students which may be interpreted as sexual harassment is prohibited and shall not be tolerated in the workplace or classroom. Additionally, any form of harassment based on age, race, religion, disability, national origin, color, marital status, sexual orientation or any protected class by or toward any employee or student of Cambridge College of Healthcare & Technology is prohibited. No one has the right to harass employees or students. Violations of this policy may result in severe disciplinary action and/or legal proceedings and may result in termination which shall not be subject in any manner whatsoever to any review by the Academic Affairs Committee. Cambridge College of Healthcare & Technology wants to provide a work/study environment which ensures that all employees and students are treated with dignity and respect.

DEFINITION
Broadly defined sexual harassment constitutes unwelcome sexual advances, request for sexual favors and other verbal or physical conduct of a sexual nature. This harassment can take two (2) forms, i.e., quid pro quo (this for that) and hostile environment harassment.

QUID PRO QUO HARASSMENT
1) Submission to such conduct is made, either explicitly or implicitly, as a condition of an individual’s choice.

2) Submission to or rejection of such conduct by an individual is used as the basis for decisions affecting such individual.

HOSTILE WORK/STUDY ENVIRONMENT HARASSMENT
Such conduct has the effect of unreasonably interfering with an individual's work or study performance, creating an intimidating, hostile or offensive environment. The intent of the alleged harasser plays no part in this type of sexual harassment. Sexual harassment can take many forms which may involve verbal and/or non-verbal behavior. Such behavior is unacceptable at the Cambridge Institute of Allied Health & Technology. Examples of sexual harassment include, but are not limited to:

- touching another person, as well as comments, jokes, innuendoes and gestures of a sexual nature;
- suggestive or obscene letters and notes;
- displaying sexually suggestive objects, photographs, cartoons, or posters;
- threats or suggestions that a lack of sexual favors will result in reprisal, such
as withholding work assignments or completing unsatisfactory performance evaluations; and
• impeding or blocking an individual's movements or any physical interference with normal work activities.

PROCEDURE
All instances of sexual harassment must be immediately brought to the attention of the Program Director or Clinical Coordinator to whom the employee or student reports, who will report the incident to the Campus Director The Campus Director Program Team to appoint the appropriate officer of Cambridge College of Healthcare & Technology to conduct a prompt confidential investigation of the claims as required by law. Instructors who receive complaints of sexual harassment must also immediately report the complaint to the Program Director who shall refer the employee or student involved to the Campus Director of Cambridge College of Healthcare & Technology in strict confidence. If the investigation confirms the sexual harassment charge, disciplinary action (which may include termination) will promptly occur. If a complaint of sexual harassment is determined to be wrongfully brought against an employee or student, appropriate disciplinary action may be taken against the employee or student who wrongfully filed the complaint. Employees and students shall not be subject to any retaliation of any sort when a complaint is being investigated or any time thereafter. Any such conduct shall also be brought to the immediate attention of the Campus Director. Cambridge College of Healthcare & Technology and appropriate action shall be taken.

Florida Senate Bill 524 (Sexually Violent Predators)
Effective July 1, 2014, the Florida Department of Law Enforcement (FDLE) has a website in existence for sexual predator and sexual offender registry. The website and toll free telephone number are below.
FDLE website - http://offender.fdle.state.fl.us/offender/homepage.do
FDLE toll-free number - 1-888-357-7332 for TTY Accessibility - 1-877-414-7234

STANDARDS AND CONDUCT

Alcohol /Drugs/Illegal Substances Policy
All students of Cambridge College of Healthcare & Technology are required to comply with the following standards of conduct. Cambridge College of Healthcare & Technology is committed to a drug free and safe learning environment for all students. Students may not possess, use or distribute illegal drugs at Cambridge College of Healthcare & Technology or any affiliate's property as well as part of any school activity. The use of illegal drugs or the abuse of legal drugs at Cambridge College of Healthcare & Technology or any affiliate's property as well as part of any school activity is expressly prohibited. Students may not be in Cambridge College of Healthcare & Technology or any affiliate's property as well as part of any school activity, in a drunken or inebriated condition or under the influence of controlled substances. Students are
required to inform the Program Director or Campus Director if they become aware of another student distributing or selling illegal drugs on the Cambridge College of Healthcare & Technology premises or any affiliate's property as well as part of any school activity.

- All students are required, at their own expense, to complete a drug screening prior to externship assignments. It is a violation of the Alcohol/Drug/Illegal Substances Policy if results prove positive for illegal drug use.
- Cambridge College of Healthcare & Technology reserves the right to mandate random drug screenings through the length of the program, at the student’s expense. It is a violation of the Alcohol/Drug/Illegal Substances Policy if results prove positive for illegal drug use.

Any student in violation of the alcohol/drug or illegal substances policy will be dismissed from the program.

**DRUG FREE CAMPUS AND WORKPLACE POLICY**

Cambridge College of Healthcare and Technology is committed to providing a drug free campus and workplace environment. As an institution of higher education, the College recognizes the need to establish a drug and alcohol awareness program to educate faculty, staff and students about the dangers of drug and alcohol abuse. This policy is established as required by the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act of 1989.

**DRUG FREE AWARENESS PROGRAM**

All employees and students are informed that the college has established a Drug Free Awareness Program informing students and employees via institutional catalog and posted flyers on campus about:

- Our policy of maintaining a drug-free school;
- Any available drug counseling, rehabilitation, and student assistance programs; and
- The penalties that may be imposed upon students for drug violations occurring on campus property, as defined in the sanctions section below.

Available referral to drug counseling and rehabilitation for employees can be obtained through United Way and students may contact the United Way for counseling and rehabilitation at 211 or [www.211.org](http://www.211.org).

A list of resources is also available in Appendix V.

**POSSESSION, SALE AND/OR CONSUMPTION OF NON-PRESCRIPTION AND ILLEGAL DRUGS**

No student may be in illegal possession of, deliver, dispense, distribute, administer, manufacture or wholesale any controlled substance, including marijuana, narcotics, hallucinogens, and other chemical analog or drug-related paraphernalia prohibited by State or Federal Drug Laws. (Federal law requires that students be informed that Federal
and State laws prohibit possession and/or use of illicit drugs. Cambridge College complies with Federal and State laws regarding illicit drugs. The campus reserves the right to investigate any suspicious activity regarding nonprescription and illegal drugs. Investigation may include but is not limited to classroom and/or vehicle inspection, canine drug scan or drug screening in cases of strong suspicion of drug use. (Refusal to submit to these measures at time of request may be viewed as strong evidence, which may result in suspension.)

Cambridge College has a “Zero-Tolerance” policy regarding the unlawful use, sale, possession or distribution of illegal drugs and alcohol on School property, or as part of any School activity. Misconduct violations relating to the Student, Faculty and/or Employee Codes of Conduct are subject to disciplinary actions. Consequences for inappropriate behavior can be severe, up to and including dismissal from the college. If any individual is apprehended for violating any alcohol or other drug related law while at a college location or activity, the college will fully cooperate with federal and state law enforcement agencies. The college abides by federal Drug-Free Workplace and Drug-Free Schools and Communities Act regulations regardless of individual state legalization.

SANCTIONS

The following are prohibited under the Code of Conduct applicable to students:
· Use, possession or distribution of narcotic or other controlled substances, except as expressly permitted by law, or being under the influence of such substances.
· Use, possession or distribution of alcoholic beverages, except as expressly permitted by law and Cambridge College regulation.

The sanctions listed below may be imposed upon any covered person found to have violated the Code of Conduct. The listing of the sanctions should not be construed to imply that covered persons are entitled to progressive discipline. The sanctions may be used in any order and/or combination that Cambridge College deems appropriate for the conduct in question.
a. Warning - A verbal or written notice that the respondent is in violation of or has violated Cambridge College regulations.
b. Probation - A written reprimand with stated conditions in effect for a designated period of time, including the probability of more severe disciplinary sanctions if the respondent is found to be violating any Cambridge College regulation(s) during the probationary period.
c. Cambridge College Suspension – temporary separation of the respondent from all Cambridge College locations.
d. Cambridge College Expulsion - Permanent separation of the respondent from all Cambridge College locations.

Faculty and Staff

Faculty and Staff of the institution are prohibited from:
· Performing school business under the influence of a controlled substance.
Possession, use, sale of a controlled substance.
Furnishing a controlled substance to a minor.
Sanctions for these violations could lead up to termination of employment. These sanctions are in addition to any criminal sanctions that may be imposed.

STATE STATUTES
The State Statutes that govern sale and consumption of alcoholic beverages for both Florida and Georgia are listed in Appendix IV.

DESCRIPTION OF HEALTH RISKS
The following are descriptions of dangerous drugs:
Drugs and/or alcohol use contribute to (Nature 2010; 468:475):
- 33% of all suicides
- 33% of all fatal motor vehicle accidents
- 50% of all homicides
Alcohol is a potentially addictive drug of significant physical and psychological consequence. Alcohol is a central nervous system depressant that affects all neurological functions. At relatively low levels it affects one's judgment and decision-making, and at higher levels it impairs the functioning of one’s vital organs and can result in a coma or death. Alcohol is an irritant to the gastrointestinal tract and moderate overindulgence ordinarily results in nausea, vomiting, and diarrhea. In addition to these significant physical consequences, there are a number of less obvious consequences to alcohol use. For example, the effects of alcohol on sleep have been well documented. Consuming several drinks before bedtime has been found to decrease the amount of REM (rapid eye movement) or dreaming sleep. The consequences of being deprived of REM sleep are impaired concentration and memory, as well as anxiety, tiredness, and irritability. Additionally, research has demonstrated that alcohol tends to decrease fear and increase the likelihood that an individual will accept risks. This lack of inhibition and judgment is a major contributor to the extraordinarily high percentage of serious accidents and accidental deaths related to alcohol use. Prolonged and excessive use of alcohol usually causes progressively more serious erosion of the gastrointestinal tract lining ranging from gastritis to ulcers and hemorrhage. Damage to the pancreas is frequent among those who have used alcohol. Interestingly, while 10% of the adult population is estimated to be addicted to beverage alcohol, (i.e., they are alcoholics), this 10% of the population comprises 35% of those hospital in-patients who receive major surgery in any given year. Alcoholism is the third major killer in the United States, second to heart disease and cancer, and acute alcohol intoxication is the second leading cause of death by poisoning.
Marijuana (Cannabis) (nicotina glauca) is an illegal drug that impairs memory, perception, judgment, and hand-eye coordination skills. The tar content in cannabis smoke is at least 50% higher than that of tobacco and thus smokers run the added risk of lung cancer, chronic bronchitis, and other lung diseases. Recently, the medical community has diagnosed the existence of an AA motivational syndrome that affects moderate to chronic users and includes symptoms of loss of energy,
motivation, effectiveness, concentration, ability to carry out long-term plans, and performance in school and work.

**LSD** (Lysergic Acid Diethylamide) is a semi-synthetic drug regarded as a hallucinogenic. Short-term effects of this drug are generally felt within an hour of consumption and may last from two to 12 hours. Physiologically the user experiences increased blood pressure, rise in body temperature, dilated pupils, rapid heartbeat, muscular weakness, trembling, nausea, chills, numbness, loss of interest in food, and hyperventilation. Fine motor skills and coordination are usually impaired, as are perception, thought, mood, and psychological processes. Long-term effects may include flashbacks, weeks and even months after taking the drug, mental illness, prolonged depression, anxiety, psychological dependence, and suicidal thoughts.

**PCP** (Phencyclidine Hydrochloride) is a white crystalline powder that was originally used as a local anesthetic, but due to extreme side effects, was discontinued in 1967. In humans, PCP is a difficult drug to classify in that reactions may vary from stupor to euphoria and resemble the effects of a stimulant, depressant, anesthetic, or hallucinogen. Short-term effects include hyperventilation, increase in blood pressure and pulse rate, flushing and profuse sweating, general numbness of the extremities, and muscular in coordination. At higher doses it causes nausea, vomiting, blurred vision, loss of balance, and disorientation. It produces profound alteration of sensation, mood and consciousness, and can cause psychotic states in many ways indistinguishable from schizophrenia. Large doses have been known to cause convulsions, permanent brain damage, and coma.

**Psilocybin** is a hallucinogenic drug occurring naturally in about 20 species of Mexican mushrooms and is also produced synthetically. It is a white powder made of fine crystals and distributed in tablet, capsule, or liquid form. Shortly after taking psilocybin, a user may experience increased blood pressure, rapid heartbeat, and an increase in body temperature, dry mouth, dilated pupils, and some degree of agitation or excitement. This is followed by a decrease in the ability to concentrate or stay in touch with reality. (Hallucinations, as well as altered perceptions of time and space, may occur.) The effects are usually shorter lasting than those of LSD, yet the dangers are very similar.

**Cocaine** is a naturally occurring stimulant drug which is extracted from the leaves of the cocoa plant. Cocaine is sold as a white translucent crystalline powder frequently cut to about half its strength by a variety of other ingredients including sugars and cleaning powders. It is one of the most powerfully addictive drugs in use today. Short-term effects of cocaine include constricted peripheral blood vessels, dilated pupils, increased heart rate and blood pressure. It also causes appetite suppression, pain indifference, possible vomiting, visual, auditory, and tactile hallucinations, and occasionally paranoia. Long term effects include nasal congestion, collapse of nasal septum, restlessness, irritability, anxiety, and depression. Overdoses or chronic use may result in toxicity which includes symptoms of seizures followed by respiratory arrest, coma, cardiac arrest, and/or death. Cocaine Free-Base or Crack is the result of converting street cocaine to a pure base by removing the hydrochloric salt in many of the “cutting” agents. The
end result is not water soluble, and therefore, must be smoked. It is much more
dangerous than cocaine because it reaches the brain in seconds, and the intensified
dose results in a sudden and intense physical reaction. This response lasts a few
minutes and is followed by deep depression, loss of appetite, difficulty in sleeping,
feeling revulsion for self, and worries and obsessions about getting more crack.
Consequently, users often increase the dose and frequency of use resulting in
severe addiction that includes physical debilitation and financial ruin.
Physiologically, seizures followed by respiratory arrest and coma or cardiac arrest
and death may accompany long-term use.

**Amphetamines** are central nervous system stimulants that were once used
medically to treat a variety of symptoms including depression and obesity. They
may be taken orally, sniffed, or injected into the veins. Short-term effects disappear
within a few hours and include reduction of appetite, increased breathing and heart
rate, raised blood pressure, dilation of pupils, dry mouth, fever, sweating,
headache, blurred vision and dizziness. Higher doses may cause flushing, rapid and
irregular heartbeat, tremor, loss of coordination, and collapse. Death has occurred
from ruptured blood vessels in the brain, heart failure, and very high fever.
Psychological effects include increased alertness, postponement of fatigue, a false
feeling of well-being, restlessness, excitability, and a feeling of power. Long-term
effects include drug dependence and the risk of drug induced psychosis.
Withdrawal includes extreme fatigue, irritability, strong hunger, and deep
depression that may lead to suicide.

**Opioids** are substances that act on opioid receptors to produce morphine-like
effects. Opioids are most often used medically to relieve pain. Opioids include
opiates, an older term that refers to such drugs derived from opium, including
morphine itself. Other opioids are semi-synthetic and synthetic drugs such as
hydrocodone, oxycodone and fentanyl; antagonist, oxycodone and fentanyl;
antagonist drugs such as naloxone and endogenous peptides such as the
endorphins. Accidental overdose or concurrent use with other depressant drugs
commonly results in death from respiratory depression. Because of opioid drugs'
reputation for addiction and fatal overdose, most are highly controlled substances.
Illicit production, smuggling, and addiction to opioids prompted treaties, laws and
policing which have realized limited success. In 2013 between 28 and 38 million
people used opioids illicitly (0.6% to 0.8% of the global population between the
ages of 15 and 65). In 2011 an estimated 4 million people in the United States used
opioids recreationally or were dependent on them. Current increased rates of
recreational use and addiction are attributed to over-prescription of opioid
medications and inexpensive illicit heroin.

**DRUG AND ALCOHOL COUNSELING**
More information about alcohol and drugs and the risks they pose to health is
available from the Campus Director at each campus. Outside counseling services
and support groups are available. See page 78 of our catalog for a list of resources.
Hyperlinks are provided for easy access. On most sites you can enter your Zip
Code for centers closest to you. A comprehensive list of resources are available in
Appendix V.

PARENT NOTIFICATION FOR DRUG AND ALCOHOL VIOLATIONS
In accordance with the Higher Education Amendments of 1998 to the Family Educational Rights and Privacy Act (FERPA) of 1974, Cambridge College has the right to notify the parent or legal guardian of a student who is under the age of 21 when the student has been found guilty through disciplinary channels of violating any Cambridge College rule regarding alcohol or illegal drugs. Cambridge College also reserves the right to notify parents at any time regarding matters of student discipline.

STUDENT CONDUCT
Cambridge College of Healthcare & Technology expects students to conduct themselves at all times in a professional manner. The forms of misconduct below are considered to be in conflict with the educational objectives of Cambridge Institute of Allied Health & Technology. Students who engage in such misconduct may be subject to dismissal by Cambridge College of Healthcare & Technology. Examples of such behavior are outlined below, but are not limited to:

• Dishonesty; including cheating, plagiarism, knowingly furnishing false information to Cambridge College of Healthcare & Technology and forgery, alteration or use of Cambridge College of Healthcare & Technology documents or identification with intent to defraud. Plagiarism is defined as:

  ➢ Direct quotation or paraphrasing from published sources that are not properly acknowledged through a bibliography.
  ➢ The use of other persons or services to prepare work that is submitted as one's own.
  ➢ The use of previously submitted papers, written by other students.
  ➢ Submission of the same or very similar papers by collaborating students.

• Intentional disruption or obstruction of teaching, research, administration, disciplinary proceedings, meetings or other Cambridge College of Healthcare & Technology activities.

• Physical or verbal abuse of any person within the Cambridge College of Healthcare & Technology organization. This also includes affiliate's property, clinical site, or functions sponsored or supervised by Cambridge College of Healthcare & Technology.

• Sexual Harassment (as defined in the catalog).

• Theft or damage to any property belonging to or occupied by Cambridge College of Healthcare & Technology and/or any damage to the property or
damage to equipment of any affiliate of Cambridge College of Healthcare & Technology.

- Students will be charged for the repair or replacement of any equipment lost or damaged through negligence or willful misconduct. This includes damage to any part of a building or its immediate surroundings or educational equipment where activities of Cambridge College of Healthcare & Technology (as well as a campus or clinical site or an affiliate’s property) take place.

- Noncompliance with directions from employees, instructors, program directors, administrators, officers or management personnel of Cambridge College of Healthcare & Technology. This also includes medical or clinical facility supervisors acting in the performance of their respective duties.

- Students in violation of the Student Conduct Policy may be suspended while the violation is reviewed by the Academic Affairs Committee. The Academic Affairs Committee decision is final, binding and conclusive.

**CONSUMER INFORMATION**

**Campus Security/Crime Prevention and Safety Programs**

In compliance with the Federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, Cambridge College of Healthcare & Technology publishes an annual security report that contains information concerning policies and programs relating to campus security, crimes and emergencies, the prevention of crimes and sexual offenses, drug and alcohol use, campus law enforcement, and access to campus facilities. The annual security report also includes statistics concerning the occurrence of specified types of crimes on campus and at certain off-campus locations. The annual security report is published each year by October 1 and contains statistics for the three most recent calendar years. The annual security report is provided to all current students. A copy of the most recent annual security report may be obtained from the VP of Compliance and Regulatory office during regular business hours.

In addition to the annual security report, each campus has security procedures to maintain a crime log of all reported crimes. The crime log is available for public inspection during regular business hours in the VP of Compliance and Regulatory’s office. Cambridge College of Healthcare & Technology will report to the campus community concerning the occurrence of any crime includable in the annual security report that is reported to campus security or local police and that is considered to be a threat to students or employees.

**Reporting crime**

Any suspicious activity, or person seen in the parking lots or loitering around vehicles, inside the buildings or around the halls should be reported to the police department. In addition, you may report a non-emergency crime to the Program Director.
**Substance Abuse Policy**

The use, possession, or distribution of prohibited substances (including alcoholic beverages, illegal chemical substances, or any legally prescribed chemical substances used in a manner contrary to a doctor’s prescription) on the Institute’s campus or on any externship site during related Institute experiences is prohibited. Any student found in violation of this rule will be dismissed from his/her program of study, and the school may also report the student to local law enforcement. The school reserves the right to administer random drug or sobriety tests or require students to submit to a drug or sobriety test “for cause” based on the behaviors outlined below. Students dismissed based on an infraction of The school’s Substance Abuse Policy have a right to appeal the factual basis of the dismissal in accordance with the school’s Grievance Policy as stated in the catalog. Students who refuse to take a random test or a “for cause” test will be terminated from their program and will be readmitted at the school’s sole discretion. A student who is taking a prescribed legal drug which could affect his or her performance is responsible for notifying the director of education and providing a physician’s certificate stating the he or she is able to safely and efficiently perform the assignments of a student.

Indications of prohibited substance use may include, but are not limited to the following: euphoria, altered judgment, impaired motor coordination, inability to concentrate, memory loss, tremors, confusion, anxiety, delusions, agitation, disorientation, profuse diaphoresis, convulsions, slurred speech, emotional instability, delirium, hallucinations, depression, paranoia, hostility, hyperreflexia, and lethargy. If a faculty or staff member of the school observes any of these symptoms, one or more of the following actions may be imposed: Immediate suspension from the school. Immediate blood alcohol level testing and/or urine drug screen testing. An applicant for re-admission must be approved by the school’s Admission Committee before he/she may resume his or her program of study. Upon one repeat violation of the school’s Substance Abuse Policy, the student may be permanently terminated from the College.

**DEFINITION OF TERMS USED IN THE SUBSTANCE ABUSE POLICY**

Possession: Having on one’s person, either in pockets, purses, book bags, or any other hand-carried container, any kind of illegal chemical substance, including any items removed from ones pockets, purses, etc. while in school. Impairment: Any condition, regardless of cause, that interferes with an individual’s ability to function as expected. Prohibited Substance: One substance or a combination of substances, including alcohol, over-the-counter drugs, prescribed drugs, or illegal drugs. Substance Abuse: Personal use of any chemical substance that is regulated by law; this includes the personal use of any normally legal chemical substance (such as alcohol or prescription drugs) in a manner that produces impairment, leads to the development of impairment, endangers the user’s health, safety or welfare, or otherwise endangers the health, safety or welfare or others, as well as the use of any illegal chemical substances.

National Institute on Drug Abuse's website specializing in the risks of using club drugs such as Ecstasy, GHB, and LSD.

Do It Now Foundation
America's Drug Information Connection: includes downloadable pamphlets, booklets, videos, articles, and posters.

Face: Truth and Clarity on Alcohol
ACE - Truth and Clarity on Alcohol, is a national non-profit organization that has a proven track record as a leader in alcohol awareness media and training. FACE utilizes the best scientific evidence available and uses it to create gripping, informative messages about alcohol-related issues.

Facts on Tap
Facts on Tap are a comprehensive alcohol and other drug education, prevention, and intervention program for college students. Features many suggestions for dealing with everyday college situations involving alcohol and drug use. Includes interactive surveys, statistics, and understanding blood alcohol levels.

Mothers Against Drunk Driving
The mission of Mothers Against Drunk Driving (MADD) is to stop drunk driving, support the victims of this violent crime and prevent underage drinking. MADD is a non-profit organization with approximately 2 million members and supporters and 600 affiliates nationwide. Since MADD's founding in 1980, alcohol-related traffic deaths have decreased by more than 40 percent and nearly 250,000 lives have been saved.

National Clearinghouse for Alcohol and Drug Information
SAMHSA's National Clearinghouse for Alcohol and Drug Information (NCADI) is the Nation's one-stop resource for information about substance abuse prevention and addiction treatment.

National Council on Alcoholism and Drug Dependence
Founded in 1944 by Marty Mann, the first woman to find long-term sobriety in Alcoholics Anonymous, the National Council on Alcoholism and Drug dependence, Inc. (NCADD) provides education, information, help and hope to the public. It advocates prevention, intervention and treatment through offices in New York and Washington, and a nationwide network of Affiliates.

National Institute on Drug Abuse
NIDA's mission is to lead the Nation in bringing the power of science to bear on drug abuse and addiction. Their website features sections geared toward young adults, teachers/parents and health professionals about the effects of drug abuse on the brain.

Partnership for a Drug Free America
The Mission of Partnership for a Drug Free America is to help kids and teens reject
substance abuse by influencing attitudes through persuasive information. This website includes interactive surveys, games, personal stories, frequently asked questions about drugs, and treatment help.

StopHazing.org
The main purpose of StopHazing.org is to serve as a resource for accurate, up-to-date hazing information for students, parents, and educators. StopHazing.org now helps to educate over 30,000 visitors/month.

The Higher Education Center for Alcohol and Other Drug Prevention
The Higher Education Center's purpose is to help college and community leaders develop, implement, and evaluate programs and policies to reduce student problems related to alcohol and other drug use and interpersonal violence.

Resources: Alcohol and Other Drugs

Copyright Policy
It is the policy of the Institution to respect the copyright protections given to authors, owners, and publishers under federal law including the Digital Millennium Copyright Act of 1998. Copyright is legal protection for creative intellectual works, which is broadly interpreted to cover almost any expression of an idea. Text (including email and Web information), graphics, arts, photographs, video and other media types, music, and software are examples of types of works protected by copyright. The creator of the work, or sometimes the person who hired the creator, is the initial copyright owner.

Copyright infringement (or copyright violation) is the unauthorized or prohibited use of works covered by copyright law, in a way that violates one of the copyright owner's exclusive rights, such as the right to reproduce or perform the copyrighted work, or to make derivative works. It is against policy for any student, faculty, staff member, consultant, contractor or other worker at the institution to copy, reproduce, share, or distribute any software, music, games, or movies on school computing equipment except as expressly permitted by a software license or with the written consent of the copyright holder or as otherwise permitted under federal law.

Willful infringement may subject a student or employee to discipline and can impact the privilege to use information technology resources at the school. Uploading
downloading works protected by copyright without the authority of the copyright owner is an infringement of the copyright owner's exclusive rights of reproduction and/or distribution. Even an innocent, unintentional infringement violates the law. Anyone found to have infringed a copyrighted work may be liable for statutory damages for each work infringed and, if willful infringement is proven by the copyright owner, that amount may be increased for each work infringed. In addition, an infringer of a work may also be liable for the attorney's fees incurred by the copyright owner to enforce his or her rights. Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than $750 and not more than $30,000 per work infringed. For "willful" infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

The College has written plans to effectively combat the unauthorized distribution of copyrighted material by users of the Institution’s network without unduly interfering with the education and research use of the network. The plan is evaluated regularly for effectiveness. Currently students are given login accounts with limited privileges which prevent them from being able to install software locally on school computers. Also, at most locations, a firewall is in place that can be configured to block malicious content from being downloaded and uploaded. The College is currently involved in project to standardize a centrally managed firewall solution that will allow for much greater control and reporting capability. The College has secured purchasing agreements with many of its hardware and software vendors that allow students to purchase these items at significant discounts. This is an alternative to help reduce illegal downloading or otherwise acquiring copyrighted material. Other alternatives are assessed regularly by the Institution.

Employees of the College are required to read and sign a Computer Use Policy. This is in place to help employees benefit from technology and allow the Institution to manage the cost and risk of such use. For more information on United States copyright law, please consult the U.S. Copyright Office’s website at http://www.copyright.gov.

**Student Lending Code of Conduct**

To follow is our code of conduct that prohibits a conflict of interest with the responsibilities of an officer, employee, and agent of the institution with respect to Federal Direct Loans or private education loans. The institution does not participate in revenue sharing arrangements with any lender. The HEOA defines “revenue-sharing arrangement” as any arrangement between an institution and a lender under which the lender makes Title IV loans to students attending the institution (or to the families of those students), the institution recommends the lender or the loan products of the lender and, in exchange, the lender pays a fee or provides other material benefits, including revenue or profit-sharing, to the institution or to its officers, employees, or
agents. The institution prohibits employees of the financial aid office from receiving gifts from a lender, guaranty agency or loan servicer. No officer or employee of an institution’s financial aid office (or an employee or agent who otherwise has responsibilities with respect to educational loans) may solicit or accept any gift from a lender, guarantor, or servicer of education loans. A “gift” is defined as any gratuity, favor, discount, entertainment, hospitality, loan, or other item having monetary value of more than a de minimums amount. However, a gift does not include (1) a brochure, workshop, or training using standard materials relating to a loan, default aversion, or financial literacy, such as a brochure, workshop or training; (2) food, training, or informational material provided as part of a training session designed to improve the service of a lender, guarantor, or servicer if the training contributes to the professional development of the institution’s officer, employee or agent; (3) favorable terms and benefits on an education loan provided to a student employed by the institution if those terms and benefits are comparable to those provided to all students at the institution; (4) entrance and exit counseling as long as the institution’s staff are in control of the counseling and the counseling does not promote the services of a specific lender; (5) philanthropic contributions from a lender, guarantor, or servicer that are unrelated to education loans or any contribution that is not made in exchange for advantage related to education loans, and; (6) State education grants, scholarships, or financial aid funds of a State. No officer or employee of an institution’s financial aid office (or employee or agent who otherwise has responsibilities with respect to education loans) may accept from a lender, or an affiliate of any lender, any fee, payment, or other financial benefit (including a stock purchase option) as compensation for any type of consulting arrangement or contract to provide services to or on behalf of a lender relating to education loans.

The institution prohibits offers of funds for private loans. An institution may not request or accept from any lender any offer of funds for private loans, including funds for an opportunity pool loan, to students in exchange for providing concessions or promises to the lender for a specific number of Title IV loans made, insured, or guaranteed, a specified loan volume, or a preferred lender arrangement. An “opportunity pool loan” is defined as a private education loan made by a lender to a student (or the student’s family) that involves a payment by the institution to the lender for extending credit to the student. The institution may not request or accept from any lender any assistance with call center staffing or financial aid office staffing, except that a lender may provide professional development training, educational counseling materials (as long as the materials identify the lender that assisted in preparing the materials), or staffing services on a short-term, nonrecurring basis during emergencies or disasters.

An employee of an institution’s financial aid office (or employee who otherwise has responsibilities with respect to education loans or financial aid) who serves on an advisory board, commission, or group established by a lender or guarantor (or a group of lenders or guarantors) is prohibited from receiving anything of value from the lender, guarantor, or group, except for reimbursement for reasonable expenses incurred by the employee for serving on the board.

**Family Educational Rights and Privacy Policy (FERPA)**

The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR 95
Part 99 is a Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. FERPA gives parents certain rights with respect to their children’s education records. These rights transfer to the student when he or she reaches the age of 18 or attends a college beyond the high school level. Students to whom the rights have transferred are “eligible students.”

Parents or eligible students have the right to inspect and review the student’s education records maintained by the school. Schools are not required to provide copies of records unless, for reasons such as great distance, it is impossible for parents or eligible students to review the records. Schools may charge a fee for copies.

- Parents or eligible students have the right to request that a college correct records which they believe to be inaccurate or misleading. If the school decides not to amend the record, the parent or eligible student then has the right to a formal hearing. After the hearing, if the school still decides not to amend the record, the parent or eligible student has the right to place a statement with the record setting forth his or her view about the contested information.

- Generally, schools must have written permission from the parent or eligible student in order to release any information from a student’s education record. However, FERPA allows schools to disclose those records, without consent, to the following parties or under the following conditions (34 CFR § 99.31):
  - School officials with legitimate educational interest,
  - Other schools to which a student is transferring,
  - Specified officials for audit or evaluation purposes,
  - Appropriate parties in connection with financial aid to a student,
  - Organizations conducting certain studies for or on behalf of the school,
  - Accrediting organizations,
  - To comply with a judicial order or lawfully issued subpoena,
  - Appropriate officials in cases of health and safety emergencies, and
  - State and local authorities, within a juvenile justice system, pursuant to specific State law.

- Schools may disclose, without consent, “directory” information such as a student’s name, address, telephone number, date and place of birth, honors and awards, and dates of attendance. However, schools must tell parents and eligible
students about directory information and allow parents and eligible students a reasonable amount of time to request that Cambridge Institute not disclose directory information about them. Schools must notify parents and eligible students annually of their rights under FERPA. The actual means of notification (special letter, inclusion in a PTA bulletin, student handbook, or newspaper article) is left to the discretion of each school.

For additional information or technical assistance, you may call (202) 260-3887 (voice). Individuals who use TDD may call the Federal Information Relay Service at 1-800-877-8339.

Violence Against Women’s Act
PURPOSE AND SUMMARY
Cambridge College of Healthcare & Technology (Cambridge) is committed to creating and maintaining a community where all individuals who participate in Cambridge programs and activities can work and learn together in an atmosphere free of harassment, exploitation, or intimidation.

Cambridge prohibits sexual harassment and sexual violence. Such behavior violates both law and Cambridge policy. Cambridge will respond promptly and effectively to reports of sexual harassment and sexual violence and will take appropriate action to prevent, to correct, and when necessary, discipline behavior that constitutes sexual harassment and / or sexual Violence, or otherwise violates the Violence against Women Act (herein referred to as “VAWA Policy”).

SCOPE OF POLICY
The VAWA Policy applies to all Cambridge employees and students.

PROHIBITED ACTS AND DEFINITIONS
In compliance with the Violence Against Women Act (VAWA), the VAWA Policy prohibits sexual harassment, domestic violence, dating violence, sexual assault, stalking and other acts that as defined below:

a. Sexual Harassment is defined as unwelcome sexual advances, requests for sexual favors, and other verbal, nonverbal, or physical conduct of a sexual nature. Sexual harassment is conduct that explicitly or implicitly affects a person’s employment or education
Or interferes with a person’s work or educational performance or creates an environment such that a reasonable person would find the conduct intimidating, hostile, or offensive. Sexual harassment includes sexual violence (see definition below). Cambridge will respond to reports of any such conduct in accordance with the VAWA, or other applicable, Policy. Sexual harassment may include incidents between any members of the Cambridge community, including faculty, staff or other employees, students or third parties such as, but not limited to: vendors, contractors, and visitors. Sexual harassment may occur in hierarchical relationships, between peers, or between individuals of the same sex or opposite sex. To determine whether the reported conduct constitutes sexual harassment, consideration shall be given to the record of the conduct as a whole and to the totality of the circumstances, including the context in which the conduct occurred.

b. Sexual Violence is defined as physical sexual acts engaged without the consent of the other without the consent of the other person or when the other person is unable to consent to the activity. Sexual violence includes sexual assault, rape, battery, and sexual coercion; domestic violence; dating violence; and stalking.

c. Domestic Violence Is defined as any felony or misdemeanor crime committed by a current or former spouse of the victim; person the victim has a child with; an individual who lives, or has lived, with the victim as a spouse, or a person similarly situated to a spouse; and any other person committing an act “against an adult or youth victim who is protected from that person’s acts under the domestic or family violence laws of the jurisdiction.

d. Dating Violence is defined as abuse committed by a person who is or has been in a social relationship of a romantic or intimate nature with the victim.

e. Sexual Assault occurs when physical sexual activity is engaged without the consent of the other person or when the other person is unable to consent to the activity. The activity or conduct may include physical force, violence, threat, or intimidation, ignoring the objections of the other person, causing the other person’s intoxication or incapacitation through the use of drugs or alcohol, or taking advantage of the other person’s incapacitation (including voluntary intoxication).

f. Forcible Sexual Offense is defined as any sexual act directed against another person, forcibly and/or against that person’s will; or not forcibly or against the person’s will where the victim is incapable of giving consent.

g. Non--Forcible Sexual Offense is defined as unlawful, non--forcible sexual intercourse. There are two types of Non--forcible Sex Offenses:

a. Incest is non--forcible sexual intercourse between persons who are related to each other within the degrees wherein marriage is prohibited by law.
b. Statutory Rape is non-forcible sexual intercourse with a person who is under the statutory age of consent.

h. **Consent is informed.** Consent is an affirmative, unambiguous, and conscious decision by each participant to engage in mutually agreed-upon sexual activity. Consent is voluntary. It must be given without coercion, force, threats, or intimidation. Consent means positive cooperation in the act or expression of intent to engage in the act pursuant to an exercise of freewill. Consent is revocable. Consent to some form of sexual activity does not imply consent to other forms of sexual activity. Consent to sexual activity on one occasion is not consent to engage in sexual activity on another occasion. A current or previous dating or sexual relationship, by itself, is not sufficient to constitute consent. Even in the context of a relationship, there must be mutual consent to engage in sexual activity. Consent must be ongoing throughout a sexual encounter and can be revoked at any time. Once consent is withdrawn, the sexual activity must stop immediately. Consent cannot be given when a person is incapacitated. A person cannot consent if s/he is unconscious or coming in and out of consciousness. A person cannot consent if s/he is under the threat of violence, bodily injury or other forms of coercion. A person cannot consent if his/her understanding of the act is affected by a physical or mental impairment.

For purposes of this Policy, the age of consent is the age consistent with Florida Law.

i. Incapacitation is defined as the physical and/or mental inability to make informed, rational judgments. States of incapacitation include, but are not limited to, unconsciousness, sleep, and blackouts. Where alcohol or drugs are involved, incapacitation is defined with respect to how the alcohol or other drugs consumed affects a person’s decision-making capacity, awareness of consequences, and ability to make fully informed judgments. Being intoxicated by drugs or alcohol does not diminish one’s responsibility to obtain consent. The factors to be considered when determining whether consent was given include whether the accused knew, or whether a reasonable person should have known, that the complainant was incapacitated.

j. Stalking is behavior in which a person repeatedly engages in conduct directed at a specific person that places that person in reasonable fear of his or her safety or the safety of others.

**CONSENSUAL RELATIONSHIPS**
The VAWA Policy covers unwelcome conduct of a sexual nature. Consensual romantic relationships between members of the Cambridge community are subject to other Cambridge policies outlined in the Employee and/or Student Handbooks. While a consensual romantic relationship between members of the Cambridge community may begin or continue for some time without issue, as relationships change they may evolve into situations that lead to charges of sexual harassment or sexual violence.
GENDER IDENTITY, GENDER EXPRESSION, OR SEXUAL ORIENTATION DISCRIMINATION
Harassment that is not sexual in nature but is based on gender, gender identity, gender expression, sex— or gender—stereotyping, or sexual orientation also is prohibited by Cambridge, as part of its nondiscrimination policy, if it denies or limits a person’s ability to participate in or benefit from Cambridge educational programs, employment, or services. While discrimination based on these factors may be distinguished from sexual harassment, these types of discrimination may contribute to the creation of a hostile work or academic environment. Thus, in determining whether a hostile environment due to sexual harassment exists, Cambridge may take into account acts of discrimination based on gender, gender identity, gender expression, sex— or gender—stereotyping, or sexual orientation.

RETRALIATION
The VAWA Policy prohibits retaliation against a person who reports sexual harassment, sexual violence or other types of harassment, or someone who assists another person with a VAWA complaint, or a person who participates in any manner in an investigation or resolution of a complain under the VAWA Policy. Retaliation includes threats, intimidation, reprisals, and/or adverse actions related to employment or education.

REPORTING SEXUAL HARASSMENT OR SEXUAL VIOLENCE
Any member of the Cambridge community may report conduct that may constitute a violation of VAWA, including sexual harassment or sexual violence, to any supervisor, manager, or the Title IX Officer. An individual who believes he or she has been subjected to sexual harassment or sexual violence may file a complaint or grievance pursuant to the applicable complaint resolution or grievance procedures as outlined in the Employee and/or Student Handbooks. Such complaint or grievance may be filed either instead of or in addition to making a report of sexual harassment to the Title IX Officer. A complaint or grievance alleging sexual harassment or sexual violence must meet all the requirements under the applicable complaint resolution or grievance procedure, including time limits for filing.

If the person to whom harassment normally would be reported is the individual accused of harassment, reports may be made to any manager, supervisor, or designated employee. Managers, supervisors, and designated employees are required to notify the Title IX Officer or other appropriate official designated to review and investigate sexual harassment Complaints when a report is received.

Any manager, supervisor, or designated employee responsible for reporting or responding to sexual harassment or sexual violence who knew about the incident and took no action to stop it or failed to report the prohibited act may be subject to disciplinary action. Reports of sexual harassment or sexual violence should be brought forward as soon as possible after the alleged conduct occurs. Prompt reporting will better enable Cambridge to respond, determine the issues, and provide an appropriate remedy and/or action. All incidents should be reported even if a significant amount of time has passed. However,
delaying a report may impede Cambridge’s ability to conduct an investigation and/or to take appropriate remedial actions.

An individual who has made a report of sexual harassment or sexual violence also may file a separate complaint or grievance alleging that the actions taken in response to the report of sexual harassment or sexual violence did not follow the VAWA Policy. Such a complaint or grievance may not be filed to address a disciplinary sanction imposed upon the accused. Any complaint or grievance regarding the resolution of a report of sexual harassment or sexual violence must be filed within EEOC time limits for filing a charge. The time period for filing begins on the date the individual was notified of the outcome of the sexual harassment or sexual violence investigation or other resolution process pursuant to the VAWA Policy, and/or of the actions taken by the administration in response to the report of sexual harassment or sexual violence, whichever is later.

RESPONSE TO REPORTS OF SEXUAL HARASSMENT OR SEXUAL VIOLENCE
Cambridge will provide a written explanation of available rights and options, including procedures to follow, when the Cambridge receives a report that the student or employee has been a victim of domestic violence, dating violence, sexual assault, or stalking, whether the offense occurred on- or off-campus or in connection with any Cambridge program.

Upon a finding of sexual harassment or sexual violence, Cambridge may offer remedies to the individual or individuals harmed by the harassment and/or violence consistent with applicable complaint resolution and grievance procedures. Both the complainant and the alleged perpetrator will be notified, in writing, about the outcome of the complaint and any appeal.

PRIVACY
Cambridge shall protect the privacy of individuals involved in a report of sexual harassment or sexual violence to the extent permitted by law and Cambridge policies. A report of sexual harassment or sexual violence may result in the gathering of extremely sensitive information about individuals in the Cambridge community. While such information is considered confidential, Cambridge policy regarding access to public records and disclosure of personal information may require disclosure of certain information concerning a report of sexual harassment or sexual violence. In such cases, every effort shall be made to redact the records in order to protect the privacy of individuals. An individual who has made a report of sexual harassment or sexual violence may be advised of sanctions imposed against the accused when the individual needs to be aware of the sanction in order for it to be fully effective (such as restrictions on communication or contact with the individual who made the report). In addition, when the offense involves a crime of violence or a non-forcible sex offense, the Family Educational Rights and Privacy Act permits disclosure to the complainant the final results of a disciplinary proceeding against the alleged accused, regardless of whether Cambridge concluded that a violation was committed. Information regarding disciplinary action taken against the accused shall not be disclosed without the accused’s consent, unless
permitted by law as noted above, or unless it is necessary to ensure compliance with the action or the safety of individuals.

REQUESTS FOR CONFIDENTIALITY
Confidential resources, outside/third party counseling sources are available for individuals who may be interested in bringing a report of sexual harassment or sexual violence with a safe place to discuss their concerns and are posted on the Cambridge website.

Individuals who consult with confidential resources shall be advised that their discussions in these settings are not considered reports of sexual harassment or sexual violence and that without additional action by the individual, the discussions will not result in any action by the Cambridge to resolve their concerns.

An individual’s requests regarding the confidentiality of reports of sexual harassment or sexual violence will be considered in determining an appropriate response; however, such requests will be considered in the dual contexts of the Cambridge’s legal obligation to ensure a working and learning environment free from sexual harassment and sexual violence and the due process rights of the accused to be informed of the allegations and their source. Some level of disclosure may be necessary to ensure a complete and fair investigation, although the Cambridge will comply with requests for confidentiality to the extent possible.

EMPLOYEE DISCIPLINARY ACTIONS FOR VIOLATIONS OF VAWA POLICY
Cambridge reserves the right to determine on case by case basis, with regard to proven or admitted violations of the VAWA Policy, disciplinary action to be taken with regard to any Cambridge employee.

Disciplinary action resulting from a determination that a violation of the VWA policy occurred, may include but are not limited to: unpaid suspension from work, altered work schedule, training or education specific to the offense, and termination of employment without the opportunity to re-apply for future employment. Cambridge, at its sole discretion may also combine various disciplinary actions it deems appropriate for the violation finding.

The final decision for any disciplinary action taken will be made at the sole discretion of Cambridge’s Responsible officers and communicated by the Title IX Coordinator. This decision may not be appealed.

STUDENT DISCIPLINARY ACTIONS FOR VIOLATIONS OF VAWA POLICY
Cambridge reserves the right to determine on case by case basis, with regard to proven or admitted violations of the VAWA Policy, disciplinary action to be taken with regard to any Cambridge student.

Disciplinary action resulting from a determination that a violation of the VWA policy occurred, may include but are not limited to: suspension from school, altered class schedule, training or education specific to the offense, community service requirements at a location determined by the school, and withdrawal from the school without the opportunity
to re-enroll. Cambridge, at its sole discretion may also combine various disciplinary actions it deems appropriate for the violation finding.

The final decision for any disciplinary action taken will be made at the sole discretion of the Cambridge Responsible Officers and communicated by the Title IX Coordinator. This decision may not be appealed.

ADDITIONAL ENFORCEMENT INFORMATION

The Federal Equal Employment Opportunity Commission (EEOC) investigates complaints of unlawful harassment, including sexual violence, in employment. The U.S. Department of Education Office for Civil Rights (OCR) investigates complaints of unlawful harassment and sexual violence by students in educational programs or activities. These agencies may serve as neutral fact finders and attempt to facilitate the voluntary resolution of disputes with the parties. For more information, contact the nearest office of the EEOC or OCR.
